The Dialectical Biologist Richard Levins
1987-03-15 Scientists act within a social context and from a philosophical perspective that is inherently political. Whether they realize it or not, scientists always choose sides. The Dialectical Biologist explores this political nature of scientific inquiry, advancing its argument within the framework of Marxist dialectic. These essays stress the concepts of continual change and codetermination between organism and environment, part and whole, structure and process, science and politics. Throughout, this book questions our accepted definitions and biases, showing the self-reflective nature of scientific activity within society.

Yoruba Ritual Margaret Thompson Drewal
1992-03-22 Yoruba peoples of southwestern Nigeria conceive of rituals as journeys -- sometimes actual, sometimes virtual. Performed as a parade or a procession, a pilgrimage, a masking display, or possession trance, the journey evokes the reflexive, progressive, transformative experience of ritual participation. Yoruba Ritual is an original and provocative study of these practices. Using a performance paradigm, Margaret Thompson Drewal forges a new theoretical and methodological approach to the study of ritual that is thoroughly grounded in close analysis of the thoughts and actions of the participants. Challenging traditional notions of ritual as rigid, stereotypic, and invariant, Drewal

reveals ritual to be progressive, transformative, generative, and reflexive and replete with simultaneity, multifocality, contingency, indeterminacy, and intertextuality. Throughout the book prominence is given to the intentionality of actors as knowledgeable agents who transform ritual itself through play and improvisation. Integral to the narrative are interpolations about performances and their meanings by Kolawole Ositola, a scholar of Yoruba oral tradition, ritual practitioner, diviner, and master performer. Rich descriptions of rituals relating to birth, death, reincarnation, divination, and constructions of gender are rendered all the more vivid by a generous selection of field photos of actual performances.

Plato the Myth Maker Luc Brisson 2000-12-15
We think of myth as a fictional story, and Plato was the first to use the term *muthos* in that sense. But Plato also used *muthos* to describe the practice of making and telling stories, the oral transmission of all that a community keeps in its collective memory. In the first part of *Plato the Myth Maker*, Luc Brisson reconstructs Plato's multifaceted and not uncritical description of *muthos* in light of the latter's famous Atlantis story. The second part of the book contrasts this sense of myth, as Plato does, with another form of speech that he believed was far superior: the logos of philosophy. Appearing for the first time in

English, Plato the Myth Maker is a solid and important contribution to the history of myth, based on the privileged testimony of one of its most influential critics and supporters.

The Complexity Turn Arch G. Woodside 2017-02-16 This book takes the reader beyond net effects and main and interaction effects thinking and methods. Complexity theory includes the tenet that recipes are more important than ingredients—any one antecedent (X) condition is insufficient for a consistent outcome (Y) (e.g., success or failure) even though the presence of certain antecedents may be necessary. A second tenet: modeling contrarian cases is useful because a high or low score for any given antecedent condition (X) associates with a high Y, low Y, and is irrelevant for high/low Y in some recipes in the same data set. Third tenet: equifinality happens—several recipes indicate high/low outcomes.

Economics Without Illusions Joseph Heath

2010-03-30 "Economics is haunted by more

fallacies than any other study known to man." --

Henry Hazlitt, *Economics in One Lesson* (1946)

Every day economic claims are used by the media or in conversation to support social and political

positions. Those on the left tend to distrust economists, seeing them as friends of the right. There is something to this, since professional economists are almost all keen supporters of the free market. Yet while factions on the right naturally embrace economists, they also tend to overestimate the effect of their support on free-market policies. The result is widespread confusion. In fact, virtually all commonly held beliefs about economics--whether espoused by political activists, politicians, journalists or taxpayers--are just plain wrong. Professor Joseph Heath wants to raise our economic literacy and empower us with new ideas. In *Economics Without Illusions*, he draws on everyday examples to skewer the six favourite economic fallacies of the right, followed by impaling the six favourite fallacies of the left. Heath leaves no sacred cows untipped as he breaks down complex arguments and shows how the world really works. The popularity of such books as *Freakonomics* and *Predictably Irrational* demonstrates that people want a better understanding of the financial forces that affect them. Highly readable, cogently argued and certain to raise ire along all points of the socio-political spectrum, *Economics Without Illusions* offers readers the economic literacy they need to genuinely understand and critique the pros and cons of capitalism.

Operating in Emerging Markets Luciano Ciravegna 2013 Master a complete roadmap for emerging market business success and profitability! Emerging markets are generating unprecedented opportunities, but they are far more complex and risky than they may seem.

Profiting in these markets entails retooling business models, products, and strategies to exploit these differences, instead of falling victim to them. Too many American, European and Japanese companies continue to operate with a "developed world" mentality that seeks to merely adapt existing products and strategies, while underestimating the unique challenges of managing a business in radically different contexts. Operating in Emerging Markets draws from real-life examples and today's most valuable research to offer a step-by-step blueprint for improving profitability in emerging markets. Pioneering researchers Dr. Luciano Ciravegna and Dr. Robert Fitzgerald walk you through understanding the true risks and challenges; identifying and investing the right resources; developing the right strategies, products, and processes; and learning from both the successes and failures that have come before you. An indispensable resource for all decision-makers in companies that are (or plan to) operating in emerging markets; and for all graduate business students who may do so in the future.

"Publications devoted to rapidly transforming economies are on the rise, but the contribution is often marginal. This new book, Operating in Emerging Markets , authored by Luciano Ciravegna, Robert Fitzgerald, and Sumit Kundu, is an exception. It provides valuable insights into what makes these economies grow and prosper. Most importantly, it responds to the need for practical approaches to tapping emerging markets. Thus it should assist current and future managers in navigating these high-potential but high-risk countries." --S. Tamer Cavusgil, Callaway Professorial Chair and Executive Director, CIBER, J. Kinderculture Shirley R. Steinberg 2018-05-04 America is a corporatized society defined by a culture of consumerism, and the youth market is one of the groups that corporations target most. By marketing directly to children, through television, movies, radio, video games, toys, books, and fast food, advertisers have produced a 'kinderculture'. In this eye-opening book, editor Shirley R. Steinberg reveals the profound impact that our purchasing-obsessed culture has on our children and argues that the experience of childhood has been reshaped into something that is prefabricated. Analyzing the pervasive influence of these corporate productions, top experts in the fields of education, sociology, communications, and cultural studies contribute incisive essays that students, parents, educators, and general readers will find insightful and entertaining. Including seven new chapters, this third edition is thoroughly updated with examinations of the icons that shape the values and consciousness of today's children, including Twilight, True Blood, and vampires, hip hop, Hannah Montana, Disney, and others.

Notes from the Gallows Julius Fucik 2017-07-19 On 24 April 1942, Czechoslovak journalist and active CPC member Julius Fucik was detained in Pankrác Prison in Prague, where he was subsequently interrogated and tortured, before being sent to Germany to stand trial for high treason. It was during this time that Fucik's Notes from the Gallows (Czech: Reportáž psaná na oprátce, literally Reports Written Under the Noose) arose—written on pieces of cigarette paper and smuggled out by two sympathetic prison warders named Kolinsky and Hora. The notes were treated as great literary works after

his death in 1943 and translated into many languages worldwide, resulting in this book, which was first published in English in 1948. It describes events in the prison since Fucik's arrest and is filled with hope for a better, Communist future.

The Rabbit on the Face of the Moon Alfredo López Austin 1996 "The Rabbit on the Face of the Moon is a collection of articles on mythology in the Mesoamerican tradition by Alfredo Lopez Austin, one of the foremost scholars of ancient Mesoamerican thought. Their span is diverse: myths and names, eclipses, stars, left and right, Mexica origins, Aztec incantations, animals, and the incorporation of Christian elements into the living mythologies of Mexico. The title essay relates the Mesoamerican myth explaining why there is a rabbit on the moon's face to a Buddhist image and suggests the importance of the profound mythical concepts presented by each image." The Ethical School Felicity Haynes 2002-01-04 Conflicts often arise between regulations, making it difficult for school management teams and teachers to resolve situations with appropriate dignity and respect for all concerned. This book discusses provocative actual case studies to help teachers to reflect on their own ethics, guiding them to make more reasonable decisions in their schools, and thereby gradually transforming schools into more cohesive and caring communities. A model of consequences, consistency and caring, each aspect based on traditional ethical theories provides a scientific base - a rational and a responsive base for ethical decision-making. This work covers such everyday problems as censorship, inclusivity, school uniform, punishment, personal gain and confidentiality, and argues that care and respect for others, equity, rational autonomy and concern for long-term benefits are more important for a

school community than short-term power and control.
