

The Sustainable Livelihoods Approach Open Repository

Unveiling the Power of Verbal Art: An Psychological Sojourn through **The Sustainable Livelihoods Approach Open Repository**

In a world inundated with monitors and the cacophony of instant connection, the profound power and psychological resonance of verbal art usually disappear into obscurity, eclipsed by the continuous onslaught of noise and distractions. However, situated within the lyrical pages of **The Sustainable Livelihoods Approach Open Repository**, a charming work of literary brilliance that impulses with organic feelings, lies an memorable trip waiting to be embarked upon. Penned by a virtuoso wordsmith, that interesting opus guides viewers on a mental odyssey, lightly revealing the latent possible and profound impact embedded within the elaborate internet of language. Within the heart-wrenching expanse of this evocative analysis, we can embark upon an introspective exploration of the book is key styles, dissect their fascinating writing model, and immerse ourselves in the indelible impact it leaves upon the depths of readers souls.

The Companion to Development Studies Vandana Desai 2008 The Companion to Development Studies is an essential one-stop reference for anyone with an interest in development studies. Over 100 international experts have been brought together to present a comprehensive overview of the key theoretical and practical issues dominating contemporary development studies. Building on the success of the first edition, the second edition of the Companion has been thoroughly revised and updated and includes new chapters on a range of topics, including ageing, culture and development, corruption and development and global terrorism. Each chapter summarises current debates and provides guidance for further reading and research. The Companion to Development Studies is indispensable for students of development studies at all levels, from undergraduate to postgraduate and beyond, in departments of development studies, geography, politics, international relations, sociology, social anthropology and economics.

Papers Presented at the Second Session of the Working Party on Small-Scale Fisheries Food and Agriculture Organization of the United Nations. Working Party on Small-Scale Fisheries

2004 The session agreed on a vision statement and on a characterization of small-scale fisheries as well as on a research agenda of five main themes. It elaborated preliminary drafts of two separate technical documents on the contribution, role and importance of small-scale fisheries and research agenda for small-scale fisheries and requested that the documents be submitted, after finalization by the Secretariat, to the ACFR at its next session

Ecosystem Services and Poverty Alleviation (OPEN ACCESS) Kate Schreckenber 2018-04-27 Understanding how to sustain the services that ecosystems provide in support of human wellbeing is an active and growing research area. This book provides a state-of-the-art review of current thinking on the links between ecosystem services and poverty alleviation. In part it showcases the key findings of the Ecosystem Services for Poverty Alleviation (ESPA) programme, which has funded over 120 research projects in more than 50 countries since 2010. ESPA's goal is to ensure that ecosystems are being sustainably managed in a way that contributes to poverty alleviation as well as to inclusive and sustainable growth. As governments across the world map how they will achieve the 17 ambitious Sustainable Development Goals, most of which have poverty

alleviation, wellbeing and sustainable environmental management at their heart, ESPA's findings have never been more timely and relevant. The book synthesises the headline messages and compelling evidence to address the questions at the heart of ecosystems and wellbeing research. The authors, all leading specialists, address the evolving framings and contexts for the work, review the impacts of ongoing drivers of change, present new ways to achieve sustainable wellbeing, equity, diversity, and resilience, and evaluate the potential contributions from conservation projects, payment schemes, and novel governance approaches across scales from local to national and international. The cross-cutting, thematic chapters challenge conventional wisdom in some areas, and validate new methods and approaches for sustainable development in others. The book will provide a rich and important reference source for advanced students, researchers and policy-makers in ecology, environmental studies, ecological economics and sustainable development. The Open Access version of this book, available at <https://www.taylorfrancis.com/books/e/9780429016295>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Sustainable Livelihoods and Rural

Development Ian Scoones 2015 Sustainable Livelihoods and Rural Development looks at the role of social institutions and the politics of policy, as well as issues of identity, gender and generation. The relationships between sustainability and livelihoods are examined, and livelihoods analysis situated within a wider political economy of environmental and agrarian change.

Understanding Poverty and the Environment

Fiona Nunan 2015-03-27 Does poverty lead to environmental degradation? Do degraded environments and natural resources lead to poverty? Or, are there other forces at play? Is the relationship between poverty and the environment really as straightforward as the vicious circle portrayal of 'poverty leading to environmental destruction leading to more poverty' would suggest? Does it matter if the relationship is

portrayed in this way? This book suggests that it does matter. Arguing that such a portrayal is unhelpful and misleading, the book brings together a diverse range of analytical frameworks and approaches that can enable a much deeper investigation of the context and nature of poverty-environment relationships. Analytical frameworks and approaches examined in the book include political ecology, a gendered lens, Critical Institutionalism, the Environmental Entitlements framework, the Institutional Analysis and Development approach, the Sustainable Livelihoods Framework, wellbeing analysis, social network analysis and frameworks for the analysis of the governance of natural resources. Recommended further reading draws on published material from the last thirty years as well as key contemporary publications, giving readers a steer towards essential texts and authors within each subject area. Key themes running through the analytical frameworks and approaches are identified and examined, including power, access, institutions and scale.

Households' Food Insecurity and Coping Strategies in the Face of Vulnerability

Mesay Kebede Duguma 2015 This book draws the attention on the livelihood and food security situation of women farmers, a topic largely neglected by academic studies. It offers in detailed empirical examination of the impact of informal social institutions on food security and coping strategies of these households in Meskan district of southern Ethiopia. The area is environmentally and socially challenged. The results develop an understanding of the gender dimension of food (in)security and present important implications for public policy. Mesay Kebede Duguma is currently working in collaboration with the Facilitation and Monitoring of Implementation (FMI) unit of the UNCCD in the framework of Land Degradation Neutrality (LDN) project.

Public Sector Accountants and Quantum Leap: How Far We Can Survive in Industrial Revolution 4.0? Akhmad Solikin 2020-08-07 The Industrial Revolution 4.0 will not only cause job losses, but will also create new workspaces that may not exist today. It also needs to be considered by

accountants in government because the processes of budget planning, budget execution, and financial reporting have used a large number of information systems. In the era of the Industrial Revolution 4.0, the changes will be faster, marked by the emergence of such systems as supercomputers, smart robots, cloud computing, big data systems, genetic engineering and the development of neurotechnology that allows humans to optimize brain function further. Industrial Revolution 4.0 will disrupt the accounting profession. This proceedings provides selected papers/research on government accounting, accountability and integrity public sector accounting, financial accounting, accounting information system, auditing and assurance, corporate sustainability, forensic and management accounting, public and corporate finance, taxation and customs, open innovation in public sector accounting. The proceedings provide details beyond what is possible to be included in an oral presentation and constitute a concise but timely medium for the dissemination of recent research results. It will be invaluable to professionals and academics in the field of accounting, finance and the public sector to get an understanding of recent research.

Climate Change Impacts and Women's Livelihood

Salim Momtaz 2018-10-08 Very few studies have been conducted to explore the vulnerability of women in the context of climate change. This book addresses this absence by investigating the structure of women's livelihoods and coping capacity in a disaster vulnerable coastal area of Bangladesh. The research findings suggest that the distribution of livelihood capitals of vulnerable women in rural Bangladesh is heavily influenced by several climatic events, such as cyclones, floods and seasonal droughts that periodically affect the region. Women face several challenges in their livelihoods, including vulnerability to their income, household assets, lives and health, food security, education, water sources, sanitation and transportation systems, because of ongoing climate change impacts. The findings have important policy relevance for all involved in disaster and risk management, both within Bangladesh and the developing countries facing

climate change impacts. Based on the research findings, the book also provides recommendations to improving the livelihoods of women in the coastal communities. This book will appeal to academics, researchers and professionals in environmental management, gender and development, and climate change governance looking at the effects of and adaptation to climate change, gender issues and natural disaster management strategies.

Understanding livelihoods dependent on inland fisheries in Bangladesh and Southeast Asia: final technical report

Community Empowerment through Research, Innovation and Open Access Joko Sayono

2021-07-20 ICHSS is an international seminar that is held every two years organized by the Research and Community Service Institute of the State University of Malang. The meeting aims to discuss the theoretical and practical developments of Social Sciences and Humanities in Indonesia and other countries with a view to build academic networks by gathering academics from various research institutes and universities. Community empowerment serves as a trigger to increase community independence and to cope with the challenges resulting from the rapid development of technology. An important aspect of the community empowerment effort is to link the results of innovation research for the benefit of community. The results of research should not only be limited to publications in the academic environment. Open Access to various forms of the existing literature is one of the requirements for innovative research to develop optimally.

Therefore, this seminar has also served as a place for field researchers from various geographical areas to socialize, to discuss and to find solutions to current issues in the field of social sciences and humanities, as well as to build cooperation and synergy in creating ideas for mutual collaboration and to create joint research.

The Impact on Poverty on Livelihoods Dr.

Athing Ningshen "The Impact of Poverty on Livelihoods" explores the complex factors that contribute to the cycle of poverty among vulnerable families. It delves into the challenging livelihood context that hinders access to crucial

resources like land, livestock, capital, and information. The book emphasizes the lack of skills and knowledge necessary to sustain livelihood assets. It also examines the shortcomings of existing strategies related to food security, economic structure, and human dignity. Additionally, the book highlights the influential roles of communal, commercial, and political factors that perpetuate poverty.

Teaching and Learning Rural Livelihoods Sandeep Tambe 2022-01-31 This book synthesizes the conceptual and applied aspects of rural livelihoods as a discipline, and collates the analytical frameworks and approaches that have been designed, applied, and discussed over the last five decades. These include the sustainable livelihoods approach with its vulnerability-asset construct, collective governance of common pool resources, livelihood trajectories and poverty dynamics, rights-based approach and social justice, graduation approach for the ultra-poor, and the resilience framework to address complex risks. The book is divided into three parts, namely: introduction to rural livelihoods; synthesis of the present state of knowledge; and strengthening the knowledge action pathway. At the end of each chapter, a set of class exercises is provided to bring about a deeper understanding of these approaches and their application in real-life situations. The expected outputs from penning this textbook are threefold. Firstly, it assimilates the rural livelihood works of eminent academicians under one cover. Secondly, it positions itself as a one-stop destination for educators by translating these concepts into a ready-to-teach applied format. Thirdly, it functions as a ready reckoner for young professionals by providing a step-by-step approach to apply these learnings in real-life situations. The purpose of this book is to provide a solid foundation to the teaching and learning of rural livelihoods in academia, bridge the gap between the science, policy, and practice of rural livelihoods, and finally shape a pool of better informed and equipped professionals in development. Special thanks to Himanshu Rohira for his contributions and assistance.

Experiencing Climate Change in Bangladesh

Salim Momtaz 2015-09-10 *Experiencing Climate Change in Bangladesh: Vulnerability and Adaptation in Coastal Regions* provides a conceptual and empirical framework for understanding the vulnerability of coastal communities in Bangladesh to multiple stressors and presents the process by which rural households adapt their livelihoods. The livelihoods of the poor people in many developing countries are disproportionately vulnerable to multiple shocks and stresses. The effects of climate change interacting with these livelihood disturbances further amplify human vulnerability. Future climate change is likely to aggravate this precarious situation. This book offers a solid framework for analyzing the process and components of adaptation of rural livelihoods to a changing hydro-climatic environment and presents empirical evidence of livelihood adaptation at the local level. The book creates a knowledge-base for the small island developing states (SIDS) experiencing similar socio-economic and climatic conditions. Also fills a market need by providing a conceptual framework, case studies, and reflections on lessons learned from policy responses for vulnerability reduction and adaptation to climate variability, extremes, and change. Presents an analyses-based adaptation to climate change in a holistic way that takes into account social, economic, and environmental stressors and their interrelationships Examines synergy between disaster risk reduction, climate change adaptation, and social protection in the context of Bangladesh Provides examples of successes and failures in climate change adaptation invaluable for developing countries in similar situations Fills a market need by providing a conceptual framework, case studies, and reflections on lessons learned from policy responses

Berkshire Encyclopedia of Sustainability 7/10 Ray C. Anderson 2012-11-01 *China, India, and East and Southeast Asia: Assessing Sustainability* provides unprecedented analyses by regional experts and scholars elsewhere in the world on China, India, and their neighbors. Despite growing demands internally on their natural resources (China and India alone are home to more than

one-third of the world's population), the expanding global economic influence of this region makes these countries vital players in a sustainable future for all citizens of the Earth. Regional coverage includes topics such as business and commerce, environmental and corporate law, and lifestyles and values.

Knowledge Solutions Olivier Serrat 2017-05-22

This book is open access under a CC BY-NC 3.0 IGO license. This book comprehensively covers topics in knowledge management and competence in strategy development, management techniques, collaboration mechanisms, knowledge sharing and learning, as well as knowledge capture and storage. Presented in accessible “chunks,” it includes more than 120 topics that are essential to high-performance organizations. The extensive use of quotes by respected experts juxtaposed with relevant research to counterpoint or lend weight to key concepts; “cheat sheets” that simplify access and reference to individual articles; as well as the grouping of many of these topics under recurrent themes make this book unique. In addition, it provides scalable tried-and-tested tools, method and approaches for improved organizational effectiveness. The research included is particularly useful to knowledge workers engaged in executive leadership; research, analysis and advice; and corporate management and administration. It is a valuable resource for those working in the public, private and third sectors, both in industrialized and developing countries.

Urban Livelihoods Tony Lloyd-Jones 2014-10-14

One of the most promising approaches to poverty reduction in developing countries is to encourage sustainable livelihoods for the poor. This takes account of their opportunities and assets and the sources of their vulnerability. Based on recent and extensive research, this volume thoroughly assesses the value of the livelihoods approach to urban poverty. The book reviews the situation and strategies of the urban poor and identifies the policies and practical programmes that work best. Lasting improvements depend not just on economic development, but on political commitment and structures that are responsive to the claims and needs of different groups of poor

people.

Sustainable Development in Africa Masafumi Nagao 2019-07-27 Consisting of nine original chapters, this volume on theory and methods on sustainable development in Africa are crafted from a series of Sustainable Development Workshops organized by eight partner universities in Africa. The book responds to the call for concepts and methods suited to explaining and understanding sustainable development challenges on the African continent. Contributors are African faculty and graduates of the three master’s programmes in Sustainable Urban Development, Sustainable Integrated Rural Development and Mining and Mineral Resources, coordinated by the eight partner African universities who make up the Education for Sustainable Development in Africa (ESDA) initiative.

The Routledge Handbook on Livelihoods in the Global South Fiona Nunan 2022-05-05

The Routledge Handbook on Livelihoods in the Global South presents a unique, timely, comprehensive overview of livelihoods in low- and middle-income countries. Since their widespread adoption in the 1990s, livelihoods perspectives, frameworks and methods have influenced diverse areas of research, policy and practice. The concept of livelihoods reflects the complexity of strategies and practices used by individuals, households and communities to meet their needs and live their lives. The Handbook brings together insights and critical analysis from diverse approaches and experiences, learning from research and practice over the last 30 years. The Handbook comprises an introductory section on key concepts and frameworks, followed by five parts, on researching livelihoods, negotiating livelihoods, generating livelihoods, enabling livelihoods and contextualising livelihoods. The introduction provides readers with an appreciation of concepts researched and applied in the five parts, including chapters on vulnerability and resilience, social capital and networks, and institutions. Each part reflects the diversity of approaches taken to understanding livelihoods, whilst recognising commonalities, including the centrality of power in shaping, enabling and constraining livelihoods.

The book also reflects diversity of context, including conflict, climate change and religion, as well as in generating livelihoods, through agriculture, small-scale mining and pastoralism. The aim of each chapter is to provide a critically informed introduction and overview of key concepts, issues and debates of relevance to the topic, with each chapter concluding with suggestions for further reading. It will be an essential resource to students, researchers and practitioners of international development and related fields. Researchers and practitioners will also benefit from the book's diverse disciplinary contributions and by the wide and contemporary coverage.

An Integrated Wetland Assessment Toolkit Oliver Springate-Baginski 2009

Environments and Livelihoods Koos Neefjes 2000

This book is intended to be used to support the campaigning and lobbying work of local and international development organizations, to improve the formulation and implementation of development strategies and to strengthen participatory project planning, monitoring and impact assessment in poverty and environmental change.

Gender in Agriculture Sourcebook World Bank 2008-10-07 The 'Gender in Agriculture Sourcebook' provides an up-to-date understanding of gender issues and a rich compilation of compelling evidence of good practices and lessons learned to guide practitioners in integrating gender dimensions into agricultural projects and programs. It serves as a tool for: guidance; showcasing key principles in integrating gender into projects; stimulating the imagination of practitioners to apply lessons learned, experiences, and innovations to the design of future support and investment in the agriculture sector. The Sourcebook draws on a wide range of experience from World Bank, Food and Agriculture Organization (FAO), International Fund for Agricultural Development (IFAD), and other donor agencies, governments, institutions, and groups active in agricultural development. The Sourcebook looks at: access to and control of assets; access to markets, information and organization; and capacity to manage risk and

vulnerability through a gender lens. There are 16 modules covering themes of cross-cutting importance for agriculture with strong gender dimensions (Policy, Public Administration and Governance; Agricultural Innovation and Education; Food Security; Markets; Rural Finance; Rural Infrastructure; Water; Land; Labor; Natural Resource Management; and Disaster and Post-Conflict Management) and specific subsectors in agriculture (Crops, Livestock, Forestry, and Fisheries). A separate module on Monitoring and Evaluation is included, responding to the need to track implementation and development impact. Each module contains three different sub-units: (1) A Module Overview gives a broad introduction to the topic and provides a summary of major development issues in the sector and rationale of looking at gender dimension; (2) Thematic Notes provide a brief and technically sound guide in gender integration in selected themes with lessons learned, guidelines, checklists, organizing principles, key questions, and key performance indicators; and (3) Innovative Activity Profiles describe the design and innovative features of recent and exciting projects and activities that have been implemented or are ongoing.

Regional Development: Concepts, Methodologies, Tools, and Applications

Management Association, Information Resources 2012-04-30 From domestic to international settings, aid and assistance to less-developed areas has recently been bolstered by a boom in technological advances and new research. *Regional Development: Concepts, Methodologies, Tools, and Applications* presents a vital compendium of research detailing the latest case studies, architectures, frameworks, methodologies, and research on regional development. With over 100 chapters from authors from around the world, this three volume collection presents the most sophisticated research and developments from the field, relevant to researchers, academics, and practitioners alike. In order to stay abreast of the latest research, this book affords a vital look into regional development research.

Sustainable Development in Amazonia Kei Otsuki

2013-03-12 This book argues against the assumption that sustainability and environmental conservation are naturally the common goal and norm for everyone in Amazonia. This is the first book focusing on agency, reflexivity and social development to address sustainable development in the region. It discusses the importance of looking into societal dynamics in order to deal with deforestation and sustainable development policies through the ethnography of an Amazonian settlement named New Paradise. This book demystifies utopian and overtly conservationist views that depict the Amazon rainforest as a troubled paradise. Engaging with social theory of practice with particular focus on emergentist perspectives and Foucault's analysis of 'heterotopia', the author shows that Amazonia is a set of settlement heterotopias in which various local and external initiatives interact to make up real, lived-in places. The settlers' placemaking continually rearranges power and material relations while the process usually emphasises utopian developmentalist and conservationist policy intervention. This book explores in detail how, as power relations are arranged and governance reshaped, sustainable development and construction of a green society also need to become a goal for the settlers themselves. The book's insights on the relationship between the sustainable development frameworks used in environmental policy, and ongoing societal development on the ground inform debate both within Amazonia, and in comparable communities worldwide. It also offers institutional pathways to realise new, more engaging, policy intervention for development professionals and policy makers.

Sustainable Livelihoods Caroline Ashley 1999
Pro-poor Tourism Strategies Caroline Ashley 2001

Climate Change, Livelihood Diversification and Well-Being Arup Mitra 2022-01-01 This book assesses the capacity of the rural populace in terms of their ability to perceive a change in climatic variables and, if so, how they react to these changes in order to minimize the adverse effect of climate change. It evaluates the role of education and exposure to change in physiological variables like temperature, precipitation, etc., in

forming the right perception of climate change. While analysing livelihood diversification as a strategy to cope with climate change concerns across geography (districts), caste, education and the primary occupation of the households, the book also considers factors affecting diversification. One important aspect of well-being is consumption; thus, by focusing on consumption changes over time and relating it to livelihood diversification, the book makes an in-depth analysis of the coping mechanisms. Diversification adopted in the face of compulsion and in a situation of stagnancy may result in a range of low productivity activities, whereas diversification as an attempt to explore newer pathways in a vibrant context to reduce income risks and smooth consumption can be highly beneficial. The book, thus, focuses on job profile and occupational diversification of the sample households, the extent of instability in occupations and the distribution of households in terms of consumption pattern, the inter-temporal changes in it and the determinants. The book is useful for researchers, students in environmental studies, policy-makers, NGOs and also the common reader who wants to understand climate change, its effects on livelihoods and ways to overcome the shocks. It reflects on effective policies which can create awareness and empower people to explore opportunities for livelihood creation so that the overall is sustained if not improved.

Climate change, land, water and food security: Perspectives from sub-saharan africa Mulala Danny Simatele 2023-06-22

Trends in Poverty and Livelihoods in Coastal Fishing Communities of Orissa State, India

Venkatesh Salagrama 2006 This study analyses the livelihoods of marine fishing communities in the Indian coastal state of Orissa using the sustainable livelihoods approach. It investigates the relationships between livelihoods and coastal poverty and seeks to develop simple qualitative indicators to monitor the changes in these relationships over time. The key trends affecting the livelihoods of the poor in the coastal fishing communities in Orissa range across the whole spectrum of "assets" - i.e. the natural, physical, social, human and financial - and contribute to

changes in terms of availability as well as access to the assets for the poorer stakeholders. This paper also examines the impact of seasonality and shocks upon the fisheries-based livelihoods and the importance and influence of various policies, institutions and processes in addressing the fishers' need to cope with their vulnerability context in a meaningful manner. It summarizes the various factors having an impact upon the livelihoods of the fishers and develops them into simple indicators relevant in assessing the changing patterns of poverty in fishing communities of Orissa.

Sustainable Livelihood Approach Stephen Morse 2013-02-13 We all view the ubiquitous term 'sustainability' as a worthwhile goal. But how can we apply the principles of sustainability in the real world, at the sharp end of communities in developing nations where income insecurity is the troubled norm? This volume provides some practical answers, explaining the precepts of the 'sustainable livelihood approach' (SLA) through the case study of a microfinance scheme in Africa. The case study, centered around the work of the Catholic Church's Diocesan Development Services organization, involved an SLA implemented over two years designed in part to help enhance its existing microfinance operation through closer links between local communities and international donors. The book's central conclusion is that we must move beyond the concept of sustainable livelihood itself, with its in-built polarities between developed and developing nations, and embrace a more global notion of 'sustainable lifestyle'; a more nuanced and inclusive approach that encompasses not just how we make a sustainable living, but how we can live sustainable lives.

Water for Agriculture Stephen Merrett 2003-08-02 World population is set to increase by a third in the next 25 years, with no corresponding increase in global rainfall. About seventy per cent of the world's abstracted water is used in farming and therefore the economics of irrigation is becoming an increasingly important issue for sustainable development. Water for Agriculture provides a thorough overview of this highly topical subject, written in a clear and accessible style. The Scope of the book is wide both in its analysis and in its

geographical coverage. Topics covered include the infrastructure, operation and maintenance of irrigation service supply, the supply of drainage services, economic cost benefit analysis, water resource planning at the regional scale, political economy and irrigation policy. The content of Water for Agriculture is enhanced by numerous tables, diagrams, and in-depth case studies. This book will be an essential read for those professionals involved in the planning of water resources, and for advanced students studying this topic as part of agriculture, development studies, economics, engineering, environmental science, geography, hydrology and planning courses.

Women Reclaiming Sustainable Livelihoods

Wendy Harcourt 2012-04-26 This volume highlights women's work sustaining local economies and environments, particularly in response to the current food, fuel and climate crises. It includes women's role in the green entrepreneurship, women's reproductive and productive work in the care economy, and a further examination of eco feminist debates.

Report of the Sustainable Fisheries Livelihoods Programme (GCP/INT/735/UK) and FAO Advisory Committee on Fisheries Research Joint Working Party on Poverty in Small-Scale Fisheries FAO Advisory Committee on Fisheries Research Joint Working Party on Poverty in Small-Scale Fisheries 2002 The objectives of the meeting were to: (i) share experience and knowledge on this subject; (ii) identify clearly how the Code of Conduct for Responsible Fisheries could serve as a tool in poverty alleviation in fishing communities; (iii) identify critical knowledge gaps and research needs; and (iv) elaborate a project framework and research methodologies.

A Sustainable Livelihood Approach to Poverty Reduction Vishwambhar Prasad Sati 2016-11-26

This book presents a socio-economic and livelihood analysis of agriculturally-dependent communities of Mizoram, the eastern extension of the Himalaya, using the sustainable livelihood approach. Such an approach to poverty reduction is inevitable, particularly, in areas where livelihoods depend largely on biomass-based agriculture and livestock production. Mizoram

possesses abundant natural resources – land, water and forest – but those resources are largely unused. The region suffers from chronic poverty and malnutrition, and climate change has further influenced livelihood patterns. This work studies all the aspects of natural potentials and livelihood status in Mizoram. It also discusses the major driving forces that influence livelihood patterns. Based on a detailed analysis of empirical data, several policy measures are suggested to cope with chronic poverty and malnutrition. The book is therefore highly useful for all stakeholders; students, researchers, academicians, policy makers and politicians involved in rural/community development.

Entrepreneurship Training in Rural Parts of Bihar/India

Tobias Aberle 2020-05-11 Tobias Aberle examines how an entrepreneurship training helps disadvantaged youths in rural parts of Bihar, India, to cope with structural conditions that enable or constrain them. The present research reveals that young entrepreneurs can be divided into two groups: those who developed personal initiative and thus coped with limiting structural conditions very proactively, and those who solely behaved in a reactive way. For many entrepreneurs, the self-employed activity was only a Plan B, as in reality they sought for high-prestige career jobs. Ifor entrepreneurship training to become a tool of empowerment, the range of training must be significantly adjusted in accordance with young trainees’ social and educational backgrounds. In addition, a functioning ecosystem for entrepreneurship education must be in place, which ensures support for individual entrepreneurs through mentorship and networks.

Sustainable Rural Development Mary Emery 2016-03-16 This book brings together several systems-level approaches to the consideration of the interaction of livelihood choices, natural resource management and participatory action research on sustainable development. By focusing on these approaches to community change, the volume hopes to encourage readers to consider how they might adopt methods such as Sustainable Livelihoods Approach (SLA), Community Capitals Framework (CCF) and

Participatory Action Research (PAR) in their own research, practice and teaching. Thus, this volume will engage readers in reflection about the importance of systems-level approaches that address poverty from the perspective of the poor, natural resource management that maintains the resource for future generations, and the engagement of local people in designing and implementing, and thus owning, strategies that address equity as well as economic security and the environment. This book was originally published as a special issue of Community Development.

Bangladesh II: Climate Change Impacts, Mitigation and Adaptation in Developing Countries

Md. Nazrul Islam 2021-08-03 This volume aims to develop a framework for disaster and climate risk resilient livelihood system in Bangladesh using a policy oriented approach. It highlights the possible impacts of climate change on groundwater based irrigation in the country. Climate change is one of biggest challenges to society. It can lead to serious impacts on production, life and environment on a global scale. Higher temperatures and sea level rise will cause flooding and water salinity problems which will bring about negative effects on agriculture and high risks to industry and socio-economic systems in the future. Climate change will lead to many changes in global development and security especially energy, water, food, society, job, diplomacy, culture, economy and trade. The Intergovernmental Panel on Climate Change (IPCC) defines climate change as: “Any change in climate over time, whether due to natural variability or as a result of human activity.” Global climate change has emerged as a key issue in both political and economic arenas. It is an increasingly questioned phenomenon, and progressive national governments around the world have started taking action to respond to these environmental concerns.

The Impact of International Migration Lira Sagynbekova 2016-04-27 This book comprises the historical overview of migration processes in Kyrgyzstan, contemporary migration trends in international migration and various social, economic and political impacts of migration. It

presents the findings of longstanding, in-depth, comprehensive and empirical research. Insights are maximized by applying the multi-sited strategy of analyzing both the migrant's place of origin and that of destination. The primary goal of the book is to contribute to a better understanding of the meanings and the impacts of contemporary international migration processes in Kyrgyzstan and their relevance for local livelihoods.

Tenure and Sustainable Use James Oglethorpe 1999 This report represents a snapshot of the issue of tenure and sustainable use by a number of leading practitioners and academics in the field. The book is in two parts: Influence of Tenure and Access Rights on the Sustainability of Natural Resource Uses and Tenure and Sustainable Use. Volume I is a collection of papers from a workshop held at the World Conservation Congress organized by the Sustainable Use Initiative, 17-20 October 1996, Montreal, Canada. Vol. II is a collection of papers from the workshop "Tenure and Sustainable Use" Organized by the Center for Development and the Environment, University of Oslo, Norway, (11-14 October, 1998) in collaboration with the Sustainable Use Initiative.

Parks for Life 97 Hugh Synge 1998

Facing Global Environmental Change Hans Günter Brauch 2009-06-04 The year 2007 could perhaps accurately be described as the year when climate change finally received the attention that this challenge deserves globally. Much of the information and knowledge that was created in this field during the year was the result of the findings of the Fourth Assessment Report (AR4) of the Intergovernmental Panel on Climate Change (IPCC), which were disseminated on a large scale and reported extensively by the media. This was the result not only of a heightened interest on the part of the public on various aspects of climate change, but also because the IPCC itself proactively attempted to spread the findings of its AR4 to the public at large. The interest generated on the scientific realities of climate change was further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US, Al Gore. By taking this decision in favour of a leader who has done a great deal to create awareness on climate change, and a body that assesses all scientific aspects of climate change and disseminates the result of its findings, the Norwegian Nobel Committee has clearly drawn the link between climate change and peace in the world.
