Walking out of school at the age of 11, unable to read or write, Hartley set up his own business buying and selling

cars. From that moment, he defied logic and ripped up the rule book on his way to the top. Today he runs one of the most successful independent family run performance and luxury car businesses in the world. He has built up an unrivalled reputation as "The Dealmaker." Tom has been at the top for over 40 years, survived and thrived through four recessions, and overcome three life threatening illnesses. In his own brutally honest words, Hartley tells his gripping story of a boy from a traditional Romany family who swapped the classroom for the cut-throat world of Glasgow's car auctions, buying and selling his first car at the age of 12. Having decided to drive himself around illegally, he was only 15 when he had his first car crash, and they don't come more spectacular than writing off a Ferrari Dino - nothing has ever been normal in the world of Tom Hartley! Hartley had made his first million by the age of 17, but soon suffered major setbacks as his business went bust, and he found himself at risk of losing his sight without major surgery. Hartley started all over again, living in a mobile home with his wife and working from the back of a car. He had gone from hero to zero, but his burning desire to be the best saw him climb his way back to the top. His ability to clinch deals in some of the most bizarre places has become legendary, like buying a car in a sauna, while stuck in a traffic jam on a motorway, and even in a swimming pool! Family has played a key part in the Tom Hartley story, his wife has been at his side all the way, and his two sons have followed closely in their father's footsteps. Indeed Tom's belief in family is one of the inspiring messages that comes through. Hartley's inspirational story is about the unshakeable belief in his own abilities, from a precocious schoolboy who had a dream, and then through sheer hard work and a burning desire to make the dream come true. This is not just a book for car enthusiasts but for anyone who has dared to dream. It's a story that will inspire and motivate, and proves you can make the wildest dream come true if you want it badly enough. Tom's remarkable story is written with the collaboration of journalist Ken Gibson, for 24 years, award-winning Motoring Editor of The Sun newspaper.

**Adjusting to Reality** ROBERT. KLITGAARD 2021-09 Originally published in 1991, Robert Klitgaard's classic book addresses questions of enduring relevance in a lively and insightful way.

Bribes, tribes, and markets that fail--these are the realities in many developing countries. The usual strategies for reform--be they capitalist or socialist--have failed to address them effectively. What is to be done when economic reforms leave the poor behind or when when new constitutions and elections are undercut by inefficient bureaucracies, overcentralization, and corruption? And what to do about persistent ethnic inequalities within developing countries? The book provides inspiring examples from around the world, as well as analytical frameworks to guide inclusive policy discussion. Theorists will enjoy the novel uses of industrial economics, the theory of the firm, and the economics of discrimination. The book highlights overlooked causes of underdevelopment: imperfect information and weak information processing in individuals and institutions. In the preface, the former President of Panama, Dr. Nicolás Ardito Barletta, writes: "Poverty, Klitgaard argues, is--and should be--a principal concern of development strategists, but policy makers and analysts will continue to run from pillar to post in their search for a cure unless they can adjust their development schemes to reality...." "The new approach that the author proposes is based on two fundamental principles. One is that the proper choice of economic strategies cannot be determined in the abstract but depends on particular circumstances... The other is that information is at the heart of problems in the real world of the developing countries... Klitgaard offers examples from Bolivia, Brazil, India, Indonesia, Malaysia, Pakistan, Peru, and the Philippines to make his point. "The author suggests creative ways in which the state and citizens themselves can solve their own 'inevitably unique problems.' One of the key tasks, in Klitgaard's view, is to ensure that environments are rich in information. This volume offers a broad framework for policy analysis that moves us closer to intelligent solutions to the real problems of the real poor in the modern world."

*Achtung-Panzer!* Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
