My True Love Lies Lenore Glen Offord 2017-01-15

In this Golden Age mystery set in post-World War II California, an art student must determine who fits the mold of a killer. The War is over, but only just, and San Francisco is still crammed with military uniforms. Of course, being San Francisco, it's also crammed with Bohemians (in a few years, they'll be known as Beatniks). Noel Bruce straddles both camps: By day she's a strait-laced driver for the Navy, but at night she lets her hair down and parties with her flamboyant art-school chums. The party comes to a screeching halt, however, when a dead body turns up in a sculptor's studio, and the artists discover that pretentious mannerisms and amusing facial hair provide little defense against the chill of fear . . . As in *Skeleton Key*, the heroine is a working woman, and, like all of Offord's novels, *My True Love Lies* provides an intriguing bridge between old-fashioned, 1930s-style plotting and a kind of feminism that feels startlingly up-to-date. "Mrs. Offord with each book entrenches herself more firmly as one of our leading feminine mystery novelists . . . There is always a reasonable plot backed by warm characters, and above all, intelligent writing." —Dorothy B. Hughes, author of *In a Lonely Place*

Artemis Fowl: The Graphic Novel Eoin Colfer 2019-06-25 In 2001, audiences first met and fell in love with a twelve-year-old criminal mastermind named Artemis Fowl. Since then, the eight-book series about his adventures has sold over twenty-

five million copies throughout the world. To coincide with the major motion picture coming from the Walt Disney Studios in August 2019, here is an all-new graphic novel adaptation of the book with crisp, accessible storytelling and clear, cinematic perspectives. Readers of all ages can now follow the siege at Fowl Manor between Artemis and the fairies in action-packed, full-color panels.

Crossing the Chasm Geoffrey A. Moore 2009-03-17 Here is the bestselling guide that created a new game plan for marketing in high-tech industries. *Crossing the Chasm* has become the bible for bringing cutting-edge products to progressively larger markets. This edition provides new insights into the realities of high-tech marketing, with special emphasis on the Internet. It's essential reading for anyone with a stake in the world's most exciting marketplace. The Idea of a Social Science and Its Relation to Philosophy Peter Winch 2008 Here Winch addresses the possibility and practice of a comprehensive 'science of society', drawing from the works of such thinkers as Ludwig Wittgenstein, J.S. Mill and Max Weber to make his case.

Eight-Grade Math Minutes: One Hundred Minutes to Better Basic Skills Doug Stoffel 2007-08 One Hundred Minutes to Better Basic Skills Take just one minute a day to quickly assess student progress in basic math skills! This book

features 100 quick drill sheets to help students increase speed in math operations and strengthen problem-solving skills. The 10 problems on each sheet can be done in one or two minutes and are a great warm-up to the daily math lesson.

The Construction of Social Reality John R. Searle 2010-05-11 This short treatise looks at how we construct a social reality from our sense impressions; at how, for example, we construct a 'five-pound note' with all that implies in terms of value and social meaning, from the printed piece of paper we see and touch. In *The Construction of Social Reality*, eminent philosopher John Searle examines the structure of social reality (or those portions of the world that are facts only by human agreement, such as money, marriage, property, and government), and contrasts it to a brute reality that is independent of human agreement. Searle shows that brute reality provides the indisputable foundation for all social reality, and that social reality, while very real, is maintained by nothing more than custom and habit.

Skeleton Key Lenore Glen Offord 2015-02-15 In this Golden Age mystery series opener set in World War II-era California, a widowed mother literally stumbles into a murder case. Georgine Wyeth is a young widow keeping house for herself and her young daughter, and paying the rent by typing for a local academic, a scientific gentleman. Working late one night (there's a war on, you know), she gets caught in a blackout, only to trip over the dying air-raid warden. A simple snatch-and-grab gone wrong? Or something more sinister? And could Georgine's work for that scientist have put her in jeopardy? Perfect for fans of Margaret Maron and Craig Rice "Lenore Glen Offord is one of the truly underrated writers of the World War II and postwar periods." —Susan Dunlap, *1001 Midnights*

Confronting the Challenges of Participatory Culture Henry Jenkins 2009-06-05 Many teens today who use the Internet are actively involved in participatory cultures—joining online communities (Facebook, message boards, game clans), producing creative work in new forms (digital sampling, modding, fan videomaking, fan fiction), working in teams to complete tasks and develop

new knowledge (as in Wikipedia), and shaping the flow of media (as in blogging or podcasting). A growing body of scholarship suggests potential benefits of these activities, including opportunities for peer-to-peer learning, development of skills useful in the modern workplace, and a more empowered conception of citizenship. Some argue that young people pick up these key skills and competencies on their own by interacting with popular culture; but the problems of unequal access, lack of media transparency, and the breakdown of traditional forms of socialization and professional training suggest a role for policy and pedagogical intervention. This report aims to shift the conversation about the "digital divide" from questions about access to technology to questions about access to opportunities for involvement in participatory culture and how to provide all young people with the chance to develop the cultural competencies and social skills needed. Fostering these skills, the authors argue, requires a systemic approach to media education; schools, afterschool programs, and parents all have distinctive roles to play. The John D. and Catherine T. Writing Spaces 1 Charles Lowe 2010-06-18 Volumes in *Writing Spaces: Readings on Writing* offer multiple perspectives on a wide-range of topics about writing, much like the model made famous by Wendy Bishop's "The Subject Is . . ." series. In each chapter, authors present their unique views, insights, and strategies for writing by addressing the undergraduate reader directly. Drawing on their own experiences, these teachers-as-writers invite students to join in the larger conversation about developing nearly every aspect of craft of writing. Consequently, each essay functions as a standalone text that can easily complement other selected readings in writing or writing-intensive courses across the disciplines at any level. Topics in Volume 1 of the series include

academic writing, how to interpret writing assignments, motives for writing, rhetorical analysis, revision, invention, writing centers, argumentation, narrative, reflective writing, Wikipedia, patchwriting, collaboration, and genres.

Reading Aloud Across the Curriculum Lester L. Laminack 2006 "In this book you'll find strategic advice for planning thematic, content-driven units that use reading aloud to scaffold understanding and increase engagement. Full of useful planning tips, classroom-tested strategies, and the authors' enthusiasm for children's literature, this book doesn't just pick up where its predecessor left off - it takes you and your students to whole new levels of cross-curricular engagement."--BOOK JACKET.

The Secret Sean Kelly & Ted Mann & Byron Preiss 2014-03-18 The tale begins over three-hundred years ago, when the Fair People—the goblins, fairies, dragons, and other fabled and fantastic creatures of a dozen lands—fled the Old World for the New, seeking haven from the ways of Man. With them came their precious jewels: diamonds, rubies, emeralds, pearls... But then the Fair People vanished, taking with them their twelve fabulous treasures. And they remained hidden until now... Across North America, these twelve treasures, over ten-thousand dollars in precious jewels in 1982 dollars, are buried. The key to finding each can be found within the twelve full-color paintings and verses of THE SECRET. Are you smart enough? THE SECRET: A TREASURE HUNT was published in 1982. The year before publication, the author and publisher Byron Preiss had traveled to 12 locations in the continental U.S. (and possibly Canada) to secretly bury a dozen ceramic casques. Each casque contained a small key that could be redeemed for one of 12 jewels Preiss kept in a safe deposit box in New York. The key to finding the casques was to match one of 12 paintings to one of 12 poetic verses, solve the resulting riddle, and start digging. Since 1982, only two of the 12 casques have been recovered. The first was located in Grant Park, Chicago, in 1984 by a group of students. The second was unearthed in 2004 in Cleveland by two members of the Quest4Treasure

forum.

Innovation Tournaments Christian Terwiesch 2009-06-09 Managers, entrepreneurs, and venture capitalists all seek to maximize the financial returns from innovation, and profits are driven largely by the quality of the opportunities they pursue. Based on a structured and process-driven approach this book demonstrates how to systematically identify exceptional opportunities for innovation. An innovation tournament, just like its counterpart in sports, starts with a large number of candidates, with opportunities as the players. These opportunities are pitted against each other until only the exceptional survive. This book provides a principled approach for the effective management of innovation tournaments - identifying a wealth of promising opportunities and then evaluating and filtering them intelligently for greatest profitability. With a set of practical tools for creating and identifying new opportunities, it guides the reader in evaluating and screening opportunities. The book demonstrates how to construct an innovation portfolio and how to align the innovation process with an organization's competitive strategy. Innovation Tournaments employs quirky, fresh examples ranging from movies to medical devices. The authors' tool kit is built on their extensive research, their entrepreneurial backgrounds, and their teaching and consulting work with many highly innovative organizations.

The Outcasts of 19 Schuyler Place E.L.

Konigsburg 2011-06-28 E.L. Konigsburg revisits the town of Epiphany to tell the story of Margaret Rose Kane, Connor's older half-sister. It's about the summer when Margaret Rose turned twelve--the same year that Cabbage Patch dolls were popular, that Sally Ride became the first woman to go into space, that El Niño turned the world upside-down. Margaret Rose begins her summer with a miserable experience at camp, from which she's rescued by her beloved, eccentric uncles. Little does she know that her uncles, in turn, need rescuing themselves--from a tyrannical city council determined to tear down her uncles' life work--three spectacularly beautiful towers that her uncles have been building since before Margaret was a baby. A rousing book about intelligence, art, and the fierce preservation of individuality, from EL Konigsburg.

Hexaflexagons and Other Mathematical

Diversions Martin Gardner 2020-10-05 Martin Gardner's Mathematical Games columns in Scientific American inspired and entertained several generations of mathematicians and scientists. Gardner in his crystal-clear prose illuminated corners of mathematics, especially recreational mathematics, that most people had no idea existed. His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him. These columns were both a revelation and a gift when he wrote them; no one--before Gardner--had written about mathematics like this. They continue to be a marvel. This volume, originally published in 1959, contains the first sixteen columns published in the magazine from 1956-1958. They were reviewed and briefly updated by Gardner for this 1988 edition.

Publics and Counterpublics Michael Warner 2021-07-06 *Publics and Counterpublics* revolves around a central question: What is a public? The idea of a public is a cultural form, a kind of practical fiction, present in the modern world in a way that is very different from other or earlier societies. Like the idea of rights, or nations, or markets, it can now seem universal. But it has not always been so. Publics exist only by virtue of their imagining. They are a kind of fiction that has taken on life, and very potent life at that. Publics have some regular properties as a form, with powerful implications for the way our social world takes shape; but much of modern life involves struggles over the nature of publics and their interrelation. There are ambiguities, even contradictions in the idea of a public. As it is extended to new contexts and media, new politics and rhetorics, its meaning can be seen to change, in ways that we have scarcely begun to appreciate. By combining historical analysis, theoretical reflection, and extended case studies, *Publics and Counterpublics* shows how the idea of a public works as a formal device in modern culture and traces its implications for contemporary life. Michael Warner offers a revisionist account at the junction of two intellectual traditions with which he has been associated: public-sphere theory and queer theory. To public-sphere theory, this book brings a new emphasis on cultural forms, and a new focus on the dynamics of counterpublics. To queer theory, it brings a new way of seeing how queer culture (among other examples) is shaped by the counterpublic environment.

Gardens of the Moon Steven Erikson 2004-06-01 Vast legions of gods, mages, humans, dragons and all manner of creatures play out the fate of the Malazan Empire in this first book in a major epic fantasy series from Steven Erikson. The Malazan Empire simmers with discontent, bled dry by interminable warfare, bitter infighting and bloody confrontations with the formidable Anomander

Rake and his Tiste Andii, ancient and implacable sorcerers. Even the imperial legions, long inured to the bloodshed, yearn for some respite. Yet Empress Laseen's rule remains absolute, enforced by her dread Claw assassins. For Sergeant Whiskeyjack and his squad of Bridgeburners, and for Tattersail, surviving cadre mage of the Second Legion, the aftermath of the siege of Pale should have been a time to mourn the many dead. But Darujhistan, last of the Free Cities of Genabackis, yet holds out. It is to this ancient citadel that Laseen turns her predatory gaze. However, it would appear that the Empire is not alone in this great game. Sinister, shadowbound forces are gathering as the gods themselves prepare to play their hand... Conceived and written on a panoramic scale, *Gardens of the Moon* is epic fantasy of the highest order--an enthralling adventure by an outstanding new voice. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Lean Startup Eric Ries 2011-09-13 Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on “validated learning,” rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, *The Lean*

2007-12 One Hundred Minutes to Better Basic Skills Help middle-grade students master essential math skills with the motivating, classroom-tested Effective Instruction for Middle School Students with Reading Difficulties Carolyn A. Denton 2012 Reading problems don't disappear when students enter middle school, recent studies show that nearly a quarter of today's eighth graders aren't able to read at a basic level. This book arms language arts teachers with lessons, strategies, and foundational knowledge they need to resolve older students' reading difficulties and increase their chances for academic success. Ideal for use with struggling readers in Grades 6 - 8, this book clearly lays out the fundamentals of effective teaching for adolescents with reading difficulties. Teachers will discover how to: select and administer assessments for comprehension, fluency, and word recognition; use assessment results to plan individualized instruction; apply research-supported instructional practices; develop flexible grouping systems; set manageable short-term learning goals with students; give appropriate and corrective feedback; monitor student progress over time; provide effective interventions within a school-

wide Response to Intervention framework; and more. To help teachers incorporate evidence-based practices into their classroom instruction they'll get more than 20 complete, step-by-step sample lessons for strengthening adolescents' reading skills. Easy to adapt for use across any curriculum, the sample lessons provide explicit models of successful instruction, with suggested teacher scripts, checklist for planning instruction, key terms and objectives, strategies for guided and independent practice, tips on promoting generalization, and more.
