Alice & Megan Forever Judi Curtin 2013-03-20

Secondary school's a whole new world! Alice and Megan are starting secondary school; with new subjects, new teachers and new friends, it's going to take a bit of getting used to. And when Megan meets Marcus, the class bad-boy who's always in trouble, but doesn't seem to care, things really start to get complicated. At least she has Home Ec class with Alice - the worst cook in the school - to look forward to, so school's not all bad! Alice's ill-fated Home Economics adventures will have readers in stitches. 'Ireland's answer to Jacqueline Wilson. Perfectly written stories of friendship and growing up . . . these sweet stories are a joy.' Irish Independent

A World of Heroes Joint Association of Classical Teachers' Greek Course 2015-02-19 *A World of Heroes* is a reader designed for students who have just completed an introductory course in ancient Greek and wish to read substantial passages of ancient authors in the original language. It introduces three of ancient Greece's most important authors, Homer, Herodotus and Sophocles, and includes such gripping and influential stories as the battle of Thermopylai (from Herodotus' Histories); the death of Hektor (the Iliad) and the fall of Oedipus. Notes accompanying each passage provide extensive help with vocabulary and translation, and each

section contains a brief introduction to the author and his work. The first edition of the book proved very successful with students and instructors for more than three decades. This, the second edition, includes the same texts as the first but provides much more help with translating and understanding them in order better to meet the needs of modern students.

Love, Money, and Parenting Matthias Doepke 2020-11-03 Doepke and Zilibotti investigate how economic forces shape how parents raise their children. They show that in countries with increasing economic inequality, such as the United States, parents push harder to ensure their children have a path to security and success. Economics has transformed the hands-off parenting of the 1960s and '70s into a frantic, overscheduled activity. Growing inequality has also resulted in an increasing 'parenting gap' between richer and poorer families, raising the disturbing prospect of diminished social mobility and fewer opportunities for children from disadvantaged backgrounds. The authors discuss how investments in early childhood development and the design of education systems factor into the parenting equation, and how economics can help shape policies that will contribute to the ideal of equal opportunity for all. --From publisher description.

The Boy in the Attic David Malone 2011-10-06
Ireland 1973: a very different world. But a tiny village in County Dublin was about to lose its innocence for ever. On a bright and sunny June afternoon, a seven-year-old boy was left in the care of his teenage neighbour. No one knew, or would even have dreamed of suspecting, that the teenager was a Satanist. The two went out to the fields to look for rabbits. The child was never seen alive again. For the first time, in *The Boy in the Attic*, David Malone reveals the exact events of that summer day: how the youngster was lured to his death, how the teenager came to delve so deeply into the occult and the nightmarish scene awaiting police when they entered the attic. But there is another disturbing question - how is it that this murder, which was easily one of the most shocking and horrific in living memory, was barely reported upon at all? Why have you never heard of the boy in the attic until now?

Time for Business Joe Stafford 2020
Investigating Science Stephen Comiskey 2016-04-08 Investigating Science is an exciting new textbook for Junior Cycle Science. The inquiry-based approach allows students to actively seek solutions, design investigations and ask new questions as they learn about the nature of science. Key features of the book: Learning outcomes are referenced for the teacher and translated into student-friendly learning intentions. The Nature of Science strand is integrated throughout and referenced in the learning outcomes. Keywords at the start of each unit assist with literacy strategies. Lightbulb questions throughout the units encourage students to explore their prior knowledge. Investigations develop an understanding of scientific processes and how to use evidence to support explanations and develop inquiry skills. Demonstrations can be done by the teacher, but some are easily converted into whole-class exercises. Concise and student-friendly definitions of key concepts present an appropriate level of information. Checkpoint questions throughout the

units can be used as a form of assessment for learning (AfL) and as homework. The 'What I have learned' summary at the end of each unit allows for assessment of progress. Question Time at the end of each unit incorporates fill in the blanks, comprehension and inquiry questions. There is a FREE eBook with this textbook! Your unique code is on the inside front cover. INVESTIGATING SCIENCE WORKBOOK FREE with each textbook purchased, this valuable resource provides wordsearches/crosswords and additional questions for every unit in the textbook. TEACHER RESOURCES The invaluable Teacher's Resource Book provides support material to enable active, yet focused, lessons and investigations. Unit PowerPoints provide support in the laboratory when undertaking demonstrations and investigations. Including click-by-click solutions to all Lightbulb, Checkpoint and end-of-chapter questions, they are a fantastic classroom aid. GillExplore.ie, our smart, reliable and easy-to-use resources platform, gives easy access for teachers to all the digital material and supporting digital resources. *Strengthening Forensic Science in the United States* National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United*

States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Local Ireland Almanac and Yearbook of Facts

Helen Curley 1999 Welcome to the millennium edition of the Local Ireland Almanac, the best-selling reference book on Ireland, North and South. No other book provides, as this one does, detailed information that accurately reflects the essence of Ireland today. This year, the Almanac has joined forces with Local Ireland, a state-of-the-art Internet leader that is creating a worldwide online community for Ireland, simultaneously launching the book and the web site, making the Almanac one of the first reference books available on the World Wide Web:

WWW.LOCALALMANAC.IE New to this edition is a detailed chronology of Ireland over the past millennium, as well as synopses of the main events that defined Ireland's past ten centuries. The book chronicles the events of the year from October 1998 to September 1999, and includes the most important news stories of that time period. Other new features have been developed to make the Almanac more user friendly, including an "at a glance" statistics table at the beginning of each chapter. This provides a handy summary of the detailed facts and figures from each field of Irish life, from arts to agriculture.

Ciara's Diary Ciara King 2017-08-25 The year is 1999. Connemara is braced for the new millennium. 'No Scrubs' rules the airwaves, bootleg DVDs of Cruel Intentions are thrilling crowds of sexually progressive teens, and if you're not matching combat trousers with platforms, you are nobody. In the midst of this perplexing world, a girl named Ciara, inspired by her heroes Anne Frank and Aung San Suu Kyi, begins to document her not dissimilar struggles - against pushy parents, mysterious boys and the stubborn non-appearance of boobs. The road ahead will be tough, but she must persevere: How else will she find fame, fortune and love in the spandex-clad arms of Dean Cain? Based on the cult radio segment of the same name, Ciara's Diary is a fresh and funny trip through the warped mind of a turn-of-the-century teenager. The spiritual successor to Adrian Mole, albeit with more shifting, Ciara's Diary is a must-read for anyone who remembers

dancing to 'Maniac 2000' at the parish disco.
