### **The School Reform Landscape Reloaded**

Christopher H. Tienken 2020-10-30 *The School Reform Landscape Reloaded: More Fear, Myths, and Lies* peels back the curtain of school reform to examine the tensions that exist between the democratic and equitable system of public education and the emerging dual system based on elite interests aimed at profit-making and decreasing education equity. The author takes in-depth and controversial look at school reform since the launch of Sputnik I. Education reform events, proposals, and policies are examined through the lens of progressivist philosophy and critical social theory. Some of the issues and policies critiqued include the neoliberal corporate influence on education, the Sputnik myth, *A Nation At Risk*, standardization, charter schools, and other relevant topics. The author provides an evidence-based view of the free-market reform ideas and he pierces the veil of the new reform policies to find that they are not built upon empirical evidence, but instead rest solidly on foundations of myth, fear, and lies. Ideas for a new set of reform policies, based on empirical evidence and supportive of a unitary, equitable, and democratic system of education are presented. *OECD Reviews of School Resources: Flemish*

*Community of Belgium 2015* Nusche Deborah 2015-12-11 The effective use of school resources is a policy priority across OECD countries. The OECD Reviews of School Resources explore how resources can be governed, distributed, utilised and managed to improve the quality, equity and efficiency of school education.

*Reading, Writing, and Literacy 2.0* Denise Johnson 2014 In today's high-stakes testing environment, integrating technology into the curriculum is often seen as something "extra" or for use with a few special projects. With the growth in Internet use by even the youngest children, educators urgently need a practical introduction to online literacy and reading comprehension. *Reading, Writing, and Literacy 2.0* offers that and more by providing tools and teaching strategies for incorporating online reading and writing into classroom learning, as well as a host of web resources that teachers can draw on to make this happen. All this without endless hours of searching! Denise Johnson's book connects to the Common Core State Standards and is organized around the Technological Literacy Assessment of the National Assessment of Education Progress (NAEP), which focuses on three areas that characterize a technologically literate person: knowledge, capabilities, and critical thinking and decision making. This resource provides everything reading teachers need to begin using technology to deepen and enrich literacy learning for all students. In addition, the author maintains a companion blog to update and add helpful teaching links. **Book Features:** An explanation of the concept and practices of literacy 2.0, and how it differs from literacy 1.0. Specific examples and resource links for using technology with diverse learners in the K-8 classroom, including translation sites and multilingual materials. Examples of teacher-to-student and student-to-student wiki and blog interactions. Companion blog offers ongoing support, including links to resources, new teaching tools, classroom examples, and more. "There are many things that I love about this book. It is written with a voice wise to both the opportunities and the challenges of classroom teaching. It also contains a vast number of ideas that can be immediately used in

your classroom. Of course, too, it describes effective teaching of new literacies with so many new technologies. In addition, it begins by providing a clear and compelling framework to put all of the upcoming ideas into a package that will make perfect sense to any teacher.” —From the Foreword by Donald J. Leu, Neag Chair in Literacy and Technology, University of Connecticut, Neag School of Education “Written in a clear and practical format, this book weaves research-based practices across print and digital literacy worlds into engaging learning communities for younger and older readers alike. Denise Johnson’s innovative lessons and assessment ideas provide step-by-step supports for designing curriculum in a Web 2.0 world.” —Julie Coiro, University of Rhode Island

### **Assessing Young Learners of English: Global and Local Perspectives**

Marianne Nikolov  
2015-10-29 This volume documents international, national, and small-scale testing and assessment projects of English language education for young learners, across a range of educational contexts. It covers three main areas: age-appropriate ‘can do statements’ and task types for teaching and testing learners between the ages of 6 to 13; innovative approaches to self-assessment, diagnostic testing, self-perception, and computer-based testing; and findings on how young learners perform on vocabulary, listening, speaking, pronunciation, and reading comprehension tests in European and Asian contexts. Early language learning has become a major trend in English language education around the globe. As a result of the spread of teaching English to a growing number of young children, assessment of and for learning have emerged as key issues. In line with this development, there is a clear and emerging need to make early language programs accountable and to assess both the progress children make over time and to quantify their achievement at various stages of development. This volume informs stakeholders about the realistic goals of early language learning, their efficiency, and how much progress children make over time.

### **The Education Invasion**

Joy Pullmann  
2017-03-14 Most Americans had no idea what

Common Core was in 2013, according to polls. But it had been creeping into schools nationwide over the previous three years, and children were feeling its effects. They cried over math homework so mystifying their parents could not help them, even in elementary school. They read motley assortments of “informational text” instead of classic literature. They dreaded the high-stakes tests, in unfamiliar formats, that were increasingly controlling their classrooms. How did this latest and most sweeping “reform” of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers, and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K-12 classes, and how the Obama administration pressured states to adopt them. Thus a federalized education scheme took root, despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as “an absolute game-changer in public education,” yet the evidence so far suggests that kids are actually learning less under it. Why, then, was such a costly and disruptive agenda imposed on the nation’s schools? Who benefits? And how can citizens regain local self-governance in education, so their children’s minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats? *The Education Invasion* offers answers and remedies.

*Shadow Education and Social Inequalities in Japan*  
Steve R. Entrich 2017-12-07 This book examines

why Japan has one of the highest enrolment rates in cram schools and private tutoring worldwide. It sheds light on the causes of this high dependence on 'shadow education' and its implications for social inequalities. The book provides a deep and extensive understanding of the role of this kind of education in Japan. It shows new ways to theoretically and empirically address this issue, and offers a comprehensive perspective on the impact of shadow education on social inequality formation that is based on reliable and convincing empirical analyses. Contrary to earlier studies, the book shows that shadow education does not inevitably result in increasing or persisting inequalities, but also inherits the potential to let students overcome their status-specific disadvantages and contributes to more opportunities in education. Against the background of the continuous expansion and the convergence of shadow education systems across the globe, the findings of this book call for similar works in other national contexts, particularly Western societies without traditional large-scale shadow education markets. The book emphasizes the importance and urgency to deal with the modern excesses of educational expansion and education as an institution, in which the shadow education industry has made itself (seemingly) indispensable.

Caribbean Children's Literature, Volume 1 Betsy Nies 2023-05-18 Contributions by María V. Acevedo-Aquino, Consuella Bennett, Florencia V. Cornet, Stacy Ann Creech, Zeila Frade, Melissa García Vega, Ann González, Louise Hardwick, Barbara Lalla, Megan Jeanette Myers, Betsy Nies, Karen Sanderson-Cole, Karen Sands-O'Connor, Geraldine Elizabeth Skeete, and Aisha T. Spencer The world of Caribbean children's literature finds its roots in folktales and storytelling. As countries distanced themselves from former colonial powers post-1950s, the field has taken a new turn that emerges not just from writers within the region but also from those of its diaspora. Rich in language diversity and history, contemporary Caribbean children's literature offers a window into the ongoing representations of not only local realities but also the fantasies that structure the genre itself. Young adult literature entered the

region in the 1970s, offering much-needed representations of teenage voices and concerns. With the growth of local competitions and publishing awards, the genre has gained momentum, providing a new field of scholarly analyses. Similarly, the field of picture books has also deepened. Caribbean Children's Literature, Volume 1: History, Pedagogy, and Publishing includes general coverage of children's literary history in the regions where the four major colonial powers have left their imprint; addresses intersections between pedagogy and children's literature in the Anglophone Caribbean; explores the challenges of producing and publishing picture books; and engages with local authors familiar with the terrain. Local writers come together to discuss writerly concerns and publishing challenges. In new interviews conducted for this volume, international authors Edwidge Danticat, Junot Díaz, and Olive Senior discuss their transition from writing for adults to creating picture books for children.

TOC Solved Papers [1-10], Practice Papers [1-15] *Methods and Materials for Teaching the Gifted* Frances A. Karnes 2021-09-23 The newly revised and updated fourth edition of *Methods and Materials for Teaching the Gifted* is an excellent introduction to gifted education and real-world learning. The chapters of this comprehensive textbook are written by respected leaders in the field of gifted education. The authors review the unique needs of gifted learners and give current information on instructional planning and

evaluation, strategies for best practices, and ongoing enhancement and support of gifted programs. Chapters include topics such as differentiated curricular design, extending learning through research, writing challenging instructional units, and developing leadership skills and innovative thinkers. Instructional practices such as problem-based learning, technology literacy, independent study, simulation and gaming, and more are addressed. A special focus is given to using the Gifted Education Programming Standards and Common Core State Standards. The fourth edition provides updated information on funding sources and public relations strategies for gifted education programs. It also includes updated lists of books, teaching materials, websites, and other resources for teachers of the gifted.

**Sociological and Philosophical Perspectives on Education in the Asia-Pacific Region** Chi-Ming Lam 2015-12-12 This book demonstrates the value of approaching education from a sociological and philosophical perspective. Specifically, it addresses current and long-standing educational issues in the Asia-Pacific region, integrating sociological and philosophical insights with practical applications in four key areas: educational aims, moral education, educational policy, and the East-West dichotomy. It discusses educational aims in terms of rationality, philosophical thinking, and sustainable development and presents the literary, religious, and analytical approaches to moral education. Four educational policies are then considered: Hong Kong's language policy, Hong Kong's policy on the internationalization of education, East Asia's policies on English education, and Australia's policy on teacher education. Different aspects of the East-West dichotomy are analysed: Confucian rationalism versus Western rationalism, Confucian learning culture versus Western learning culture, and Asian research methodology versus Western research methodology. Taken as a whole, the book shows that issues in education are rarely simple, and looking at them from multiple perspectives allows for rich and informed debates. It presents a rare philosophical and sociological analysis of the cultures and experiences of

education in the Asia-Pacific region, and promotes research that leads to more culturally rooted educational policies and practice.

**The Routledge Handbook of English Language Education in Bangladesh** Shaila Sultana 2020-12-17 This Handbook is a comprehensive overview of English language education in Bangladesh. Presenting descriptive, theoretical, and empirical chapters as well as case studies, this Handbook, on the one hand, provides a comprehensive view of the English language teaching and learning scenario in Bangladesh, and on the other hand comes up with suggestions for possible decolonisation and de-elitisation of English in Bangladesh. The Handbook explores a wide range of diverse endogenous and exogenous topics, all related to English language teaching and learning in Bangladesh, and acquaints readers with different perspectives, operating from the macro to the micro levels. The theoretical frameworks used are drawn from applied linguistics, education, sociology, political science, critical geography, cultural studies, psychology, and economics. The chapters examine how much generalisability the theories have for the context of Bangladesh and how the empirical data can be interpreted through different theoretical lenses. There are six sections in the Handbook covering different dynamics of English language education practices in Bangladesh, from history, policy and practice to assessment, pedagogy and identity. It is an invaluable reference source for students, researchers, and policy makers interested in English language, ELT, TESOL, and applied linguistics.

**Handbook of Literacy in Africa** R. Malatesha Joshi

**Exploring Digital Communication** Caroline Tagg 2015-04-10 Routledge Introductions to Applied Linguistics is a series of introductory level textbooks covering the core topics in Applied Linguistics, primarily designed for those beginning postgraduate studies or taking an introductory MA course, as well as advanced undergraduates. Titles in the series are also ideal for language professionals returning to academic study. The books take an innovative 'practice to theory' approach, with a 'back-to-front' structure.

This leads the reader from real-world problems and issues, through a discussion of intervention and how to engage with these concerns, before finally relating these practical issues to theoretical foundations. Exploring Digital Communication aims to discuss real-world issues pertaining to digital communication, and to explore how linguistic research addresses these challenges. The text is divided into three sections (Problems and practices; Interventions; and Theory), each of which is further divided into two subsections which reflect linguistic issues relating to digital communication. The author seeks to demystify any perceived divide between online and offline communication, arguing that issues raised in relation to digital communication throw light on language use and practices in general, and thus linguistic interventions in this area have implications not only for users of digital communication but for linguists' general understanding of language and society. Including relevant research examples, tasks and a glossary, this textbook is an invaluable resource for postgraduate and upper undergraduate students taking New Media or Communication Studies modules within Applied Linguistics and English Language courses.

*Taylor's 7th Teaching and Learning Conference*

*2014 Proceedings* Siew Fun Tang 2015-06-01

These conference proceedings showcase a rich and practical exchange of approaches and vital evidence-based practices taking place around the world. They clarify the complex challenges involved in bringing about a holistic educational environment in schools and institutes of higher learning that fosters greater understanding and offer valuable insights on how to avoid the pitfalls that come with rolling out holistic approaches to education. To do so, the proceedings focus on the subthemes Support and Development, Mobility and Diversity and Networking and Collaboration in Holistic Education.

**Literacies, Learning, and the Body** Grace Enriquez 2015-10-16 The essays, research studies, and pedagogical examples in this book provide a window into the embodied dimensions of literacy and a toolbox for interpreting, building on, and inquiring into the range of ways people

communicate and express themselves as literate beings. The contributors investigate and reflect on the complexities of embodied literacies, honoring literacy learners and teachers as they holistically engage with texts in complex sociopolitical, historical, and cultural contexts. Considering these issues within a multiplicity of education spaces and literacy events inside and outside of institutional contexts, the book offers a fresh lens and rhetoric with which to address literacy education policies, giving readers a discursive repertoire necessary to develop and defend responsive curricula within an increasingly high-stakes, standardized schooling climate.

**English 5-11** David Waugh 2016-06-23 English is central to the primary-school curriculum and successfully mastering the basics has a significant influence on pupils' ability to learn and achieve their future goals. Now fully updated, English 5-11 provides comprehensive, up-to-date and creative guidance on teaching English in the primary school. Each chapter provides the busy teacher with indispensable advice and guidance, as well as opportunities to reflect upon current practice in the classroom. Key areas covered include: ■ language and literacy development; ■ grammar, punctuation and spelling; ■ talk for learning; ■ systematic synthetic phonics; ■ fiction, poetry and non-fiction; ■ drama and creativity; ■ teaching in a multilingual classroom; ■ ICT ■ Planning and assessment. This third edition reflects changes in government policy and gives greater attention knowledge about language and is closely related to the changing curriculum for primary English. The highly experienced authors are former literacy advisors and have frontline teaching, school-management and teacher-training experience. This book will be an invaluable resource for all trainee and practising teachers interested in teaching English in an accessible, contemporary and dynamic way.

**Handbook of Research on Teaching the English Language Arts** Diane Lapp 2017-11-06 Now in its fourth edition, the Handbook of Research on Teaching the English Language Arts - sponsored by the International Literacy Association and the National Council of Teachers of English - remains at the forefront in bringing

together prominent scholars, researchers, and professional leaders to offer an integrated perspective on teaching the English language arts and a comprehensive overview of research in the field. Reflecting important developments since the publication of the third edition in 2010, this new edition is streamlined and completely restructured around "big ideas" in the field related to theoretical and research foundations, learners in context, and new literacies. A Companion Website extends and enhances the Handbook with a wealth of additional resources. The Handbook of Research on Teaching the English Language Arts, Fourth Edition: Addresses all of the language arts within a holistic perspective (speaking/listening, language, writing, reading). Is well grounded and balanced in theory and research while promoting validated practice. Features authors who are known for their expertise and who represent diversity in culture, years in the profession, and geographic location. Gives attention to special populations and instructional contexts. Includes new media literacies. Has the authority of a research handbook while remaining practical for students in masters and doctoral classes.

#### **Teaching Learners with Visual Impairment**

Maximus M. Sefotho 2020-12-31 This book, Teaching Learners with Visual Impairment, focuses on holistic support to learners with visual impairment in and beyond the classroom and school context. Special attention is given to classroom practice, learning support, curriculum differentiation and assessment practices, to mention but a few areas of focus covered in the book. In this manner, this book makes a significant contribution to the existing body of knowledge on the implementation of inclusive education policy with learners affected by visual impairment.

#### **Demotivation in Second Language**

**Acquisition** Keita Kikuchi 2015-08-05 SLA literature tends to focus predominantly on what motivates language learners, but what demotivates them has not been widely discussed. This book, focusing exclusively on demotivation, will help readers to understand motivational issues from a different perspective. The aims of the work are threefold: to present the current

developments of demotivation research in the field of SLA and bridge motivational theory/research and demotivation research; to promote the understanding of possible causes of demotivation; and to expand the focus of demotivation research through a reflection on current motivation theory/research and a discussion of methodological issues. The research presented in this book is situated in Japanese English-teaching contexts and will serve as a foundation for anyone wishing to better understand the causes of demotivation in SLA and to explore the topic in their own contexts.

#### **Handbook of Human and Social Conditions in**

#### **Assessment** Gavin T. L. Brown 2016-06-23

The Handbook of Human and Social Conditions in Assessment is the first book to explore assessment issues and opportunities occurring due to the real world of human, cultural, historical, and societal influences upon assessment practices, policies, and statistical modeling. With chapters written by experts in the field, this book engages with numerous forms of assessment: from classroom-level formative assessment practices to national accountability and international comparative testing practices all of which are significantly influenced by social and cultural conditions. A unique and timely contribution to the field of Educational Psychology, the Handbook of Human and Social Conditions in Assessment is written for researchers, educators, and policy makers interested in how social and human complexity affect assessment at all levels of learning.

Organized into four sections, this volume examines assessment in relation to teachers, students, classroom conditions, and cultural factors. Each section is comprised of a series of chapters, followed by a discussant chapter that synthesizes key ideas and offers directions for future research. Taken together, the chapters in

this volume demonstrate that teachers, test creators, and policy makers must account for the human and social conditions that shape assessment if they are to implement successful assessment practices which accomplish their intended outcomes.

*English Linguistics, Literature, and Language Teaching in a Changing Era* Suwarsih Madya 2019-10-22 This book offers a wide range of topics for the scholar interested in the study of English in this unsettling era of disruption in our lives – from linguistics to literature to language teaching and learning. The chapters present snippets of thoughts and critical reflections, findings from action research and other methodologies, and essays on troubling topics for language teachers. The authors are researchers, experienced teachers, and students engaged in exploratory research. The many ideas and suggestions for further reflection and research will inspire teachers and researchers working in many different contexts, both educational and regional. There is something in this book for everybody.

English Language Learners and the New Standards Margaret Heritage 2020-01-15 In *English Language Learners and the New Standards*, three leading scholars present a clear vision and practical suggestions for helping teachers engage ELL students in simultaneously learning subject-area content, analytical practices, and language. This process requires three important shifts in our perspective on language and language learning—from an individual activity to a socially engaged activity; from a linear process aimed at correctness and fluency, to a developmental process, focused on comprehension and communication; and from a separate area of instruction to an approach that embeds language development in subject-area activities. In *English*

*Language Learners and the New Standards*, the authors: Clarify the skills and knowledge teachers need to integrate content knowledge and language development Show how teachers can integrate formative assessment in ongoing teaching and learning Discuss key leverage points and stress points in using interim and summative assessments with ELLs Provide classroom vignettes illustrating key practices Finally, the authors explain the theories and research that underlie their vision and examine the role of policy in shaping pedagogy and assessment for ELL students.

Changing the Conventional University Classroom Enakshi Sengupta 2022-08-01 *Changing the Conventional University Classroom* highlights the interventions practiced around the world by higher education instructors forced to make necessary changes in the conversion from face-to-face educational instruction to the use of online and virtual platforms during the COVID pandemic.

Pedagogic Practices, Student Engagement and Equity in Chinese as a Foreign Language Education Wen Xu 2021-12-27 This book explores and analyses Chinese as a Foreign Language (CFL) pedagogic practices and learning experiences within a cohort of low socio-economic status students within an Australian primary classroom. It demonstrates that, in spite of policy and educational discourses underpinning ‘Asian literacies’, Chinese teaching and learning is a fragile undertaking in Australian schooling. The politicisation of CFL education, especially in the post COVID-19 era, has exacerbated public stereotypes concerning racism and multiculturalism in Australia today. Drawing upon Bernstein’s theorisation and engagement framework, Wen Xu sketches out CFL education as a democratic space where power and control relations can be deliberately operated to reinforce engaging learning experiences. She suggests that pedagogic interventions in the name of social justice have the potential to make consequential differences in disadvantaged students’ life trajectories, and CFL education can be envisioned as an avenue towards socioeconomic mobility instead of being criticised as a platform opposing to liberal ideas. In turn, she provides insights into

teaching younger age CFL learners in the global context, in terms of the structuring of pedagogy and curriculum. Wen Xu's research will be of interest to students and scholars in sociology of education, student engagement, pedagogy and curriculum, CFL education and languages education, as well as pre-service teachers and practitioners who teach Chinese as a Foreign Language.

**English Language Teaching in Moroccan Higher Education** Hassan Belhiah 2020-04-15 This book explores the global spread of English and its ramifications for the status of English in Morocco. It sheds light on motivational issues in English language teaching and learning in Moroccan higher education and examines various teaching practices in terms of: teaching effectiveness, assessment and evaluation, written feedback, English-Arabic translation, and undergraduate supervision. In addition to identifying critical issues in the discipline of English studies and the main challenges facing English departments from historical, institutional, and pedagogical perspectives, it suggests strategies for addressing and overcoming them.

**The Challenge of Stability and Security in West Africa** Alexandre Marc 2015-06-19 Since independence, the West African sub-region has been an arena for a number of large-scale conflicts and civil wars, as well as simmering and low-intensity uprisings. Contrary to perceptions, West Africa in its post-independence history has experienced fewer conflict events and fatalities from conflict than the other sub-regions on the continent. The turn of the millennium has witnessed the recession of large-scale and conventional conflict, and it has ushered in new and emerging threats. The specters of religious extremism, maritime piracy, and narcotics trafficking threaten to undermine some of the progress achieved in recent years. The Challenge of Stability and Security in West Africa critically

examines the key drivers of conflict and violence, and the way in which they impact the countries of the sub-region. In addition to emerging threats, these drivers include the challenges of youth inclusion, migration, sub-regional imbalances, and extractives, as well as challenges related to the fragility of political institutions and managing the competition for power, reform of the security sector, and weakness of institutions related to land management. The book explores how the sub-region, under the auspices of the regional organization ECOWAS, has become a pioneer on the continent in terms of addressing regional challenges. The Challenge of Stability and Security in West Africa also identifies key lessons in the dynamics of resilience in the face of political violence and civil war drawn from Cote d'Ivoire, Liberia, and Sierra Leone, that can be useful for countries around the world in similar situations. It incorporates knowledge and findings from leading experts and provides insights from academics and development practitioners. Finally, the book identifies possible policy and programmatic responses and directions for policy dialogue at the national and international levels.

**On Your Mark** Thomas R. Guskey 2014-08-05 Create and sustain a learning environment where students thrive and stakeholders are accurately informed of student progress. Clarify the purpose of grades, craft a vision statement aligned with this purpose, and discover research-based strategies to implement effective grading and reporting practices. Identify policies and practices that render grading inaccurate, and understand the role grades play in students' future success and opportunities.

**L2 Selves and Motivations in Asian Contexts** Matthew T. Apple 2016-11-23 This book fills an existing gap in language learning motivation research by examining the applications of current motivational theories and models from WEIRD (Western, educated, industrialized, rich, developed) contexts to educational systems in Asian contexts. All chapters are focused on second language (L2) motivation as it applies to the EFL situation in Asian countries where English is a mandatory subject in school. Themes in the volume cover the use of possible L2 selves as a

theoretical model of motivation, the role of teacher motivation and demotivation in non-European educational systems, study abroad, motivation among adolescents, cross-cultural differences in learner motivation among Asian cultures and the influence of native speakerism on language motivation and cultural identity. This book will appeal to ESL/EFL educators, postgraduate students, researchers and teacher-trainers both inside and outside Asian countries, who are interested in research on L2 motivation in general and within Asian contexts in particular.

**Language Choice in Postcolonial Law** Richard Powell 2020-02-24 This book discusses multilingual postcolonial common law, focusing on Malaysia's efforts to shift the language of law from English to Malay, and weighing the pros and cons of planned language shift as a solution to language-based disadvantage before the law in jurisdictions where the majority of citizens lack

proficiency in the traditional legal medium. Through analysis of legislation and policy documents, interviews with lawyers, law students and law lecturers, and observations of court proceedings and law lectures, the book reflects on what is entailed in changing the language of the law. It reviews the implications of societal bilingualism for postcolonial justice systems, and raises an important question for language planners to consider: if the language of the law is changed, what else about the law changes?
