Mapping Policy Preferences from Texts Andrea Volkens 2013-11-28 The Manifesto data are the

only comprehensive set of policy indicators for social, economic and political research. It is thus vital that their quality is established. The purpose of this book is to review methodological issues that have got in the way of straightforwardly using the Manifesto data since our two preceding volumes were published and to resolve them in ways which best serve users and textual analysts in general. The book is thus generally about text-based quantitative analysis with a particular focus on the quality of the CMP-MARPOR data and ways of assessing and using them. In doing so the book goes beyond normal data documentation - essential though that is - to confront the analytic issues faced by users of the data now distributed by MARPOR. It also provides concrete strategies for tackling these at the research level, with examples from the field of political representation. The problems of uncertainty, error, reliability and validity considered here are generic issues for political analysts in any area of research, so the book has an interest extending beyond the Manifesto estimates themselves - in particular to other textual analyses. In addition the book widens the range of applications introduced in our two previous volumes and discusses the extension of the manifesto project database to cover Latin America.

Structure and Architecture Angus J. MacDonald 2015-10-08 'Structure and Architecture' is an essential textbook for students and practitioners of architecture and structural engineering. MacDonald explains the basic principles of structure and describes the ranges of structure types in current use. Furthermore, the book links these topics directly with the activity of architectural design and criticism. An update of the first edition, 'Structure and Architecture 2ed' includes a revised opening chapter, and a new section that discusses prominent buildings constructed since the last edition was published in 1994. Angus MacDonald deals with structures holistically, relating detailed topics back to the whole structure and building. He aims to answer the questions: What are architectural structures? How does one define the difference between the structure of a building and all of the other components and elements of which it consists? What are the requirements of structures? What is involved in their design? An understanding of the concepts involved in answering these questions

and an appreciation of how the structure of a building functions enhances the ability of an individual to appreciate its architectural quality. This book is unique in that it discusses the structural component of architectural design in the context of visual and stylistic issues.

Hospitality Retail Management Conrad Lashley 2009-11-03 'Hospitality Retail Management' provides students and managers with a practical guide to managing units in hospitality retail organizations. Customers rely on a particular chain of hotels, restaurants or pubs to provide the same level of service and environment across the board. This standardised service provides the customer with the security of knowing what to expect from that particular organisation. However, this standardisation allows little room for creativity for individual managers to respond to the particular needs of their local market. There is a growing realisation that there is greater profitability if the chain can offer both standardised services across all its retail operations while at the same time allowing local managers the freedom to interpret the needs of its local market as they see fit. 'Hospitality Retail Management' shows managers and students how competitive advantage can be gained by adopting management techniques which are both 'tight and loose', and demonstrates how you can manage businesses with well-defined objectives while also allowing local managers to interpret their local market as they see fit. Conrad Lashley has done extensive consultancy with companies such as McDonalds and uses case studies from these companies to reiterate key issues throughout the text.

Five Secrets to Living a Happy Life Mary McDonald 2019-06-21 ABOUT THE BOOK What is life without happiness? A certain Grade II pupil was once asked what he would like to be when he grew up. His response was terse but highly impactful: to be happy! We would all rather be happy individuals but, sadly, we do not understand the basics involved in being happy. All through our journeys in life, we seek wealth, pleasures, fame, fulfilment in our careers, quality education, productive social relationships, sound health, among others, but often in neglect of the most vital thing: happiness! It is quite ironical to think that it is in our life achievements that we can find happiness. How wrong! This misinformed mindset forces us to misplace our priorities, thereby seeking happiness in our achievements rather than seeking achievements in our happiness. The reality check sets in when we realise later in life that we have expended our energies on things that do not bring us joy in the long run! Quite the contrary, true happiness lies not in things, fame, achievements or people around us. *5 Secrets to Living a Happy Life* unveils the hidden truths about the nature of happiness. The book is sectionalized into six carefully and sequentially arranged chapters that reveal the following: -The deep secrets about happiness; -How to find long-lasting happiness; -How to be a truly happy person; -Salient questions about the nature of happiness; -Common habits that steal away your joy; -The importance of staying happy despite challenges; -Specific areas where you can find true happiness for your soul, etc In the first three chapters, questions bordering around the nature of happiness, the importance of

happiness, the unknown enemies of your joy, without neglecting the specific areas where you can find true happiness, are raised and answered. The second part - the last two chapters - discuss the possibility and need for happiness in the face of life's many challenges. Faced with tons of troubles in our education, careers, family life and other core aspects of our lives, we often get entrapped in sorrow while frantically finding solutions to our problems. In this book, you will discover the right attitude towards challenges. This section also reveals to you the individualism of happiness, emphasizing that your happiness as a person depends solely on you, and no one else. Highly recommendable for all, *5 Secrets to Living a Happy Life* is a complete package that guides you through becoming happy in all aspects of your life. It comes with step-by-step approaches segmented into action steps for your daily and weekly practice. What you have in your hand is a treasure you will be glad to uncover. Make the choice to read and practice today, and you will be eternally glad that you did!
