Whispering Smith Frank H. Spearman 2008-10
Disaster stalked the rails from the day the division superintendent of a pioneer Western railroad fired the wrecking boss, Murray Sinclair, for looting smashed freight cars. Sinclair and his bandits began a reign of terror, burning bridges, and holding up trains. In desperation, the railroad called in Whispering Smith, its ace troubleshooter. Smith, however, was conflicted about this job. Sinclair had once been his best friend and was the husband of the woman Smith loved.

You Can Never Have Enough... Roses Marcos Johnson 2013-06-11 "About two years ago, the poems began arriving in Joaquin Phoenix's mailbox, small batches of them, day after day, for weeks -- poetry that was unsolicited, previously unpublished and rawer than steak tartare. Written by Marcos Johnson, a former TV casting agent with an extreme personality, their jagged stanzas spoke of bruised romanticism and hardscrabble street life. The actor found them impossible to put out of mind." LA Times 2007

The Routledge Handbook of Language

Testing Glenn Fulcher 2021-12-16 This second edition of The Routledge Handbook of Language Testing provides an updated and comprehensive account of the area of language testing and assessment. The volume brings together 35 authoritative articles, divided into ten sections, written by 51 leading specialists from around the world. There are five entirely new chapters covering the four skills: reading, writing, listening, and speaking, as well as a new entry on corpus linguistics and language testing. The remaining 30 chapters have been revised, often extensively, or entirely rewritten with new authorship teams at the helm, reflecting new generations of expertise in the field. With a dedicated section on technology in language testing, reflecting current trends in the field, the Handbook also includes an extended epilogue written by Harding and Fulcher, contemplating what has changed between the first and second editions and charting a trajectory for the field of language testing and assessment. Providing a basis for discussion, project work, and the design of both language tests themselves and related validation research, this Handbook represents an invaluable resource for students, researchers, and practitioners working in language testing and assessment and the wider field of language education.

The Fourth Industrial Revolution Klaus Schwab
2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Global Study on Homicide 2013 United Nations 2014-06-15 The Global Study on Homicide 2013 is based on comprehensive data from more than 200 countries/territories, and examines and analyses patterns and trends in homicide at the global, regional, national and sub-national levels. Such analysis is fundamental to understanding the various factors and dynamics that drive homicide, so that measures can be developed to reduce violent crime. The Study provides a typology of homicide, including homicide related to crime, coexistence-related homicide, and socio-political homicide. The nature of crime in several countries emerging from conflict, the role of various mechanisms in killing, and the response of the criminal justice system to homicide are also analyzed. A further chapter examines homicide at the sub-national level, and includes analysis at the city-level for selected global cities.

Prevention of Accidents at Work Ales Bernatik 2017-09-25 Prevention of Accidents at Work collects papers presented at the 9th International Conference on the Prevention of Accidents at Work (WOS 2017) held in Prague, Czech Republic, on October 3-6, 2017, organized by the VSB-Technical University of Ostrava. The conference on current issues within occupational safety is organized under the umbrella of Workingonsafety.net (WOS.net). WOS.net is an international network of decision-makers, researchers and professionals responsible for the prevention of accidents and trauma at work. The network aims to bring accident prevention experts together in order to facilitate the exchange of experience, new findings and best practices between different countries and sectors. WOS.net is supported by the European Agency for Safety and Health at Work (EU-OSHA). The overall theme is safety management complexity in a changing society, with the motto: Do we need a holistic approach? Underlying topics include: Foundations of safety science: theories, principles, methods and tools; Research to practice: achievements, lessons learned and challenges; Risk management

and safety culture: case studies, best practices and further needs; Safety regulation: reasonable practicable approach; Education and training: prerequisite for safety; Complexity and safety: multidisciplinary and inter-stakeholder views. Prevention of Accidents at Work should be valuable to researchers, policy makers, safety professionals, labor inspectors, labor administrators and other experts in the prevention of occupational accidents.
