2012-08-14 NEW YORK TIMES BESTSELLER
“First-rate suspense.”—People Twenty years ago, top agents from the CIA and KGB banded together to bring down the Matarese Circle, an international cabal of power brokers and assassins whose sole objective was to achieve worldwide economic domination. Now the bloody Matarese dynasty is back—and the only man with the power to stop it may have already run out of time. CIA case officer Cameron Pryce is hot on the trail of the new Matarese alliance. His only chance to terminate its ruthless activities is to follow the trail of blood money and stone-cold killers right to the heart of its deadly conspiracy. Their chain of violence is impossible to stop—until Pryce gets a rare break. July 1914 Sean McMeekin 2014-04-29 When a Serbian-backed assassin gunned down Archduke Franz Ferdinand in late June 1914, the world seemed unmoved. Even Ferdinand's own uncle,

Franz Josef I, was notably ambivalent about the death of the Hapsburg heir, saying simply, "It is God's will." Certainly, there was nothing to suggest that the episode would lead to conflict -- much less a world war of such massive and horrific proportions that it would fundamentally reshape the course of human events. As acclaimed historian Sean McMeekin reveals in July 1914, World War I might have been avoided entirely had it not been for a small group of statesmen who, in the month after the assassination, plotted to use Ferdinand's murder as the trigger for a long-awaited showdown in Europe. The primary culprits, moreover, have long escaped blame. While most accounts of the war's outbreak place the bulk of responsibility on German and Austro-Hungarian militarism, McMeekin draws on surprising new evidence from archives across Europe to show that the worst offenders were actually to be found in Russia and France, whose belligerence and duplicity ensured that war was inevitable. Whether they plotted for war or rode the whirlwind nearly blind, each of the men involved -- from Austrian Foreign Minister Leopold von Berchtold and German Chancellor Bethmann Hollweg to Russian Foreign Minister Sergei Sazonov and French president Raymond Poincaré--sought to capitalize on the fallout from Ferdinand's murder, unwittingly leading Europe toward the greatest cataclysm it had ever seen. A revolutionary account of the genesis of World War I, July 1914 tells the gripping story of Europe's countdown to war from the bloody opening act on June 28th to Britain's final plunge on August 4th, showing how a single month -- and a handful of men -- changed the course of the twentieth century.

Countdown (Reality Benders Book #1)

Michael Atamanov 2018-04-13 At long last, an extraterrestrial civilization reached out and made the First Contact. However, no one on Earth took their communique for the genuine article. In a similar vein, very few people appreciated just how little time our new suzerains had promised to keep our planet safe. Regardless, the end of their message showed humankind how to access a mysterious game. The objective of this game is unclear. No one can say where its servers are

located, and its inner workings are beyond comprehension. But the game slowly gained momentum, pulling in more and more players. Soon enough, it became impossible to ignore the fact that things that happened in the game had a direct impact on our reality. And not only ours...But as people figure out this mysterious game, the countdown timer ticks away. And no one can say exactly what will happen when Earth's safety is no longer guaranteed.

The 2030 Spike Colin Mason 2013-06-17 The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, The 2030 Spike serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

Countdown to College Monique Rinere 2019-03-05 After all the testing and touring and applying, your child has been accepted to college. Congratulations! Now what? Every new student grapples with making a successful transition to college—with remaining healthy, happy, grounded, and in school. Indeed, the national

statistics are sobering: One in three freshmen will not come back for sophomore year, and less than 50 percent will graduate on time. A student's adjustment is key, especially during the period starting with the lazy summer months before move-in and ending at the dizzying close of a student's first semester. Distilling lessons and sharing stories (some cautionary, some entertaining, all helpful) from her long college advisory career, three-time Ivy League dean Monique Rinere presents a unique month-by-month road map to a college experience that is rich, rewarding, and successful for teens and parents alike. Taking parents from the moment the acceptances arrive to the end of the first college semester, her expert advice covers:

- assessing the right fit among your child's options: who and what to ask to get the real scoop on campus and academic life
- understanding actual costs: considering hidden expenses, financial-aid and scholarship fine print, loans, and work-study opportunities
- parenting through the senior slump so that students don't jeopardize their hard-won college spot
- talking to your child about freshman culture shock and their new freedoms around parties, food, finances, and sleep
- what your child needs to know about working with an academic advisor, interacting with professors, and creating their own community of advisors
- how to help your rising freshman create a conceptual bridge from what they are, a graduating high school senior, to what they want to be, a college alum
- time-management and class-scheduling tips to help your child pick an appropriate class (and extracurricular) load
- advice for parents facing the emptying nest: letting go of your anxieties about your child's autonomy and seizing this opportunity to reinvent your life in new and intentional ways

"A valuable and comprehensive guide for parents of college-bound students . . . The months between high school and college are a critical time, but Dr. Monique Rinere gives you confidence that everything will be all right."—Marvin Krislov, president, Pace University

Countdown Deborah Wiles 2016-04-26 Four

starred reviews greeted this new, groundbreaking classic from Deborah Wiles! Franny Chapman just wants some peace. But that's hard to get when her best friend is feuding with her, her sister has disappeared, and her uncle is fighting an old war in his head. Her saintly younger brother is no help, and the cute boy across the street only complicates things. Worst of all, everyone is walking around just waiting for a bomb to fall. It's 1962, and it seems that the whole country is living in fear. When President Kennedy goes on television to say that Russia is sending nuclear missiles to Cuba, it only gets worse. Franny doesn't know how to deal with what's going on in the world--no more than she knows with how to deal with what's going on with her family and friends. But somehow she's got to make it.

Think Java Allen B. Downey 2016-05-06
Currently used at many colleges, universities, and high schools, this hands-on introduction to computer science is ideal for people with little or no programming experience. The goal of this concise book is not just to teach you Java, but to help you think like a computer scientist. You'll learn how to program—a useful skill by itself—but you'll also discover how to use programming as a means to an end. Countdown Anshuman Tiwari 2022-01-30 The unprecedented calamity of the COVID-19 pandemic, especially a harsh lockdown, battered the Indian economy at a time when it was already grappling with a deep structural slowdown. Almost a year on, when the first signs of a tentative recovery were just visible, India was hit by a devastating second wave of the pandemic. Countdown tries to make economic sense of this disaster. As millions lost their jobs and walked back hundreds of kilometres or looked in vain for a hospital bed or oxygen, billionaires made more money than ever before and the stock markets climbed to new highs. This crisis laid bare India's extreme economic disparities. Even during the best growth years, India failed to create enough jobs or invest substantially in human development. The country's toughest economic challenge since 1947 comes at a time when her main resource, her demographic strength, is about to run out too.
