Digital Video Quality Stefan Winkler 2013-05-28 Visual quality assessment is an interdisciplinary topic that links image/video processing, psychology and physiology. Many engineers are familiar with the image/video processing; transmission networks side of things but not with the perceptual aspects pertaining to quality. Digital Video Quality first introduces the concepts of human vision and visual quality. Based on these, specific video quality metrics are developed and their design is presented. These metrics are then evaluated and used in a number of applications, including image/video compression, transmission and watermarking. Introduces the concepts of human vision and vision quality. Presents the design and development of specific video quality metrics. Evaluates video quality metrics in the context of image/video compression, transmission and watermarking. Presents tools developed for the analysis of video quality

Printing Types, Their History, Forms, and Use

Daniel Berkeley Updike 1962 This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1922 Excerpt: ...century, typographical material in American printing-houses--at any rate before the Revolution--was almost all foreign. Franklin records in his Autobiography that his brother James secured both his press and type from England, and there are repeated allusions to the necessity of procuring such materials abroad for various Colonial printing-offices. When manager of Keimer's press in Philadelphia, Franklin writes: "Our printing-house often wanted sorts, and there was no letter-founder in America; I had seen types cast at James's in London, but without much attention to the manner; however, I now con Thomas's History of Printing, Worcester, 1810, Vol. I, pp. 251 et seq. In the broadside Account of the Fire at Harvard College, dated January 25, 1794, among the losses chronicled, this paragraph occurs: "A font of Greek types (which, as we had not yet a printing-office, was reposit in the library) presented by our great benefactor the late worthy Thomas Hollis, Esq; of London; whose picture, as large as the life, and institutions for two Professorships and ten Scholarships perished in the flames." tri ved a mould, made use of the letters we had as puncheons, struck the matrices in lead, and thus supply'd in a pretty tolerable way all deficiencies." The earliest types in such offices as that of Bradford, the first New York printer, were probably Dutch and English; later types were English, and chiefly those of Caslon--although after 1775 (roughly speaking), type was made in North America. Primers and books, newspapers and broadsides, were mostly printed in Caslon old style types in the mid-eighteenth century and up to the Revolution. Indeed, the Declaration of Independence itself was printed in the Caslon letter. It was the face commonly in ...

Improving Complex Systems Today Daniel D. Frey 2011-07-09 As the main theme of *Improving Complex Systems Today* implies, this book is intended to provide readers with a new perspective on concurrent engineering from the standpoint of systems engineering. It can serve as a versatile tool to help readers to navigate the ever-changing state of this particular field. The primary focus of concurrent engineering was, at first, on bringing downstream information as far upstream as possible by introducing parallel processing in order to reduce time to market and to prevent errors at a later stage which would sometimes cause irrevocable damage. Up to now, numerous new concepts, methodologies and tools have been developed, but over concurrent engineering's 20-year history the situation has changed extensively. Now, industry has to work in the global marketplace and to cope with diversifying requirements and increasing complexities. Such globalization and diversification necessitate collaboration across different fields and across national boundaries. Thus, the new concurrent engineering calls for a systems approach to gain global market competitiveness. *Improving Complex Systems Today* provides a new insight into concurrent engineering today.

The Central Intelligence Agency and Overhead Reconnaissance Gregory Pedlow 2016-03-15 The CIA's 2013 release of its book *The Central Intelligence Agency and Overhead Reconnaissance 1954-1974* is a fascinating and important historical document. It contains a significant amount of newly declassified material with respect to the U-2 and Oxcart programs, including names of pilots; codenames and cryptonyms; locations, funding, and cover arrangements; electronic countermeasures equipment; cooperation with foreign governments; and overflights of the Soviet Union, Cuba, China, and other countries. Originally published with a Secret/No Foreign Dissemination classification, this detailed study describes not only the program's technological and bureaucratic aspects, but also its political and international context, including the difficult choices faced by President Eisenhower in authorizing overflights of the Soviet Union and the controversy surrounding the shoot down there of U-2 pilot Francis Gary Powers in 1960. The authors discuss the origins of the U-2, its top-secret testing, its specially designed high-altitude cameras and complex life-support systems, and even the possible use of poison capsules by its pilots, if captured. They call

attention to the crucial importance of the U-2 in the gathering of strategic and tactical intelligence, as well as the controversies that the program unleashed. Finally, they discuss the CIA's development of a successor to the U-2, the Oxcart, which became the world's most technologically advanced aircraft. For the first time, the more complete 2013 release of this historical text is available in a professionally typeset format, supplemented with higher quality photographs that will bring alive these incredible aircraft and the story of their development and use by the CIA. This edition also includes a new preface by author Gregory W. Pedlow and a foreword by Chris Pocock. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Theatre Buildings Association of British Theatre Technicians 2010-06-08 The Association of British Theatre Technicians produced its first guide to the design and planning of theatres in 1972. Revised in 1986, it became the standard reference work for anyone involved in building, refurbishing, or creating a performance space. Theatre Buildings – a design guide is its successor. Written and illustrated by a highly experienced team of international theatre designers and practitioners, it retains the practical approach of the original while extending the scope to take account of the development of new technologies, new forms of presentation, changing expectations, and the economic and social pressures which require every part of the theatre to be as productive as possible. The book takes the reader through the whole process of planning and designing a theatre. It looks in detail at each area of the building: front of house, auditorium, backstage, and administrative offices. It gives specific guidance on sightlines, acoustics, stage engineering, lighting, sound and video, auditorium and stage formats. Aspects such as catering,

conference and education use are also covered. The information is supplemented by twenty-eight case studies, selected to provide examples which range in size, style and format and to cover new buildings, renovations, conversions, temporary and found space. The studies include Den Norsk, Oslo; The Guthrie Theatre, Minneapolis; The Liceu, Barcelona; Les Bouffes du Nord, Paris; The RSC's Courtyard Theatre in Stratford on Avon; and the MTC Theatre in Melbourne. All have plans and sections drawn to 1:500 scale. The book contains around 100 high quality full colour images as well as over 60 specially drawn charts and diagrams explaining formats, relationships and technical details.

The Secret River Kate Grenville 2013 Convict William Thornhill, exiled from the stinking slums of early 19th century London, discovers that the penal colony offers something that he never dared to hope for before: a place of his own. A stretch of land on the Hawkesbury River is Thornhill's for the taking. As he and his family seek to establish themselves in this unfamiliar territory, they find that they are not the only ones to lay a claim to the land. The Hawkesbury is already home to a family of Dharug people, who are reluctant to leave on account of these intruders. As Thornhill's attachment to the place and the dream deepens, he is driven to make a terrible decision that will haunt him for the rest of his life.

A History of Video Art Chris Meigh-Andrews 2013-11-07 A History of Video Art is a revised and expanded edition of the 2006 original, which extends the scope of the first edition, incorporating a wider range of artists and works from across the globe and explores and examines developments in the genre of artists' video from the mid 1990s up to the present day. In addition, the new edition expands and updates the discussion of theoretical concepts and ideas which underpin contemporary artists' video. Tracking the changing forms of video art in relation to the revolution in electronic and digital imaging that has taken place during the last 50 years, A History of Video Art orients video art in the wider art historical context, with particular reference to the shift from the structuralism of the late 1960s and

early 1970s to the post-modernist concerns of the 1980s and early 1990s. The new edition also explores the implications of the internationalisation of artists' video in the period leading up to the new millennium and its concerns and preoccupations including post-colonialism, the post-medium condition and the impact and influence of the internet.

Disability and Human Rights Edurne García Iriarte 2015-10-06 Experienced by more than one billion people worldwide, disability is increasingly recognised as a human rights issue internationally. Completely up to date, *Disability and Human Rights* draws on cutting edge international research and real life examples to explore the global dimension of disability and to critically review progress on the implementation of the United Nations Convention on the Rights of Persons with Disabilities. This book provides readers with an in-depth exploration of disability across key areas of human rights, including health, education, employment, accessibility and independent living. It demonstrates how these issues are integral to achieving full and equal participation of disabled people in human societies across the life cycle. The book analyses the impact of poverty, the importance of support and the relevance of culture and it maps out how to make disability rights a reality in the coming decades. Chapters are enriched with a wide range of international case examples and questions for reflection to deepen readers' understanding of the material. Students and practitioners from a wide range of backgrounds, including disability studies, human rights, social work and social care will benefit from this much-needed new global perspective on disability.

Efficacy of Suicide Prevention Programs for Children and Youth Bing Guo 2002 The main focus of this review is to present the findings from primary research that assessed the efficacy/effectiveness of suicide prevention programs on school aged children and youth (i.e., ages 5 to 19 years) including school-based or community-based suicide prevention programs An assessment tool developed, pre-tested and modified in other Canadian reviews was used to critically appraise the quality of the published studies. Most of the studies focused on the general student population, while a few studies first categorized students as 'at-risk' or 'in need' before the intervention. Six out of 10 studies were rated as moderate to strong in relation to their methodological quality. Two out of these six studies using similar approaches for risk stratification and delivering intervention programs with similar objectives, showed consistent and

encouraging evidence on the effects (for example, decreases in depression, hopelessness, stress, anxiety and anger) of their programs. Despite these findings the overall methodological weaknesses and inconsistent findings from the studies indicate that there is insufficient evidence

to either support or not to support curriculum-based suicide prevention programs in schools.
