Sonic Experience Jean-François Augoyard 2006-04-05 Never before has the everyday soundtrack of urban space been so cacophonous. Since the 1970s, sound researchers have attempted to classify noise, music, and everyday sounds using concepts such as Pierre Schafer's sound object and R. Murray Schafer's soundscape. Recently, the most significant team of soundscape researchers in the world has been concerned with the effects of sounds on listeners.

Composing for the Cinema Ennio Morricone 2013-10-10 With nearly 400 scores to his credit, Ennio Morricone is one of the most prolific and influential film composers working today. In *Composing for the Cinema*, Morricone and musicologist Sergio Miceli present a series of lectures on the composition and analysis of film music. Adapted from several lectures and seminars, these lessons show how sound design can be analyzed and offer a variety of musical solutions to many different kinds of film. Drawing upon scores by himself and others, the composer also provides insight into his relationships with many of the directors with whom he has collaborated, including Sergio Leone, Giuseppe Tornatore, Franco Zeffirelli, Warren Beatty, Ridley Scott, Roland Joffé, the Taviani Brothers, and others. Delivered in a conversational mode that is both comprehensible and interesting, this groundbreaking work intertwines analysis with

practical details of film music composition.

El poseedor y el poseído Peter Kivy 2015-07-20
Este libro trata sobre el concepto del genio artístico y sobre la forma en que llegó a ser representado por tres grandes compositores de la era moderna: Handel, Mozart y Beethoven. La elección de estos tres músicos no es la expresión de una preferencia personal, sino que viene determinada por hechos históricos: en su época, sus contemporáneos los destacaron especialmente, y los dos últimos también lo son en nuestra época, no sólo como símbolos del genio musical sino del genio tout court. El poseedor y lo poseído. Haendel, Mozart, Beethoven y el concepto de genio musical es un ensayo sobre la idea de genio, desde el análisis de dos concepciones opuestas: una la del genio como ser inspirado, de orígenes antiguos y formulada en Platón, y otra, moderna, aunque ya presente en el Pseudo Longino, del genio como artista que rompe las reglas vigentes y establece otras originales. Aunque no son los únicos modelos posibles, sirven para explicar como Handel, Mozart y Beethoven han sido considerados en nuestra tradición no solo genios musicales, sino más aún la imagen misma del genio.

Orientalism Edward W. Said 2014-10-01 More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, *Orientalism* remains one of the most important books written about our divided world.
