Academic libraries have seen huge changes in recent years thanks to the increasing availability of information online but they are now undergoing another shift. As libraries move away from providing access to existing information and towards helping users create new knowledge there is an opportunity for them to develop new services for the research community. To do this successfully libraries need to have a knowledgeable workforce who are equipped to provide the support that researchers need. Information professionals are increasingly being asked to advise their users on issues such as open access and research data management but are often doing so with little or no formal preparation. Outlining the reasons why library staff need to develop a knowledge of research support and guiding them through the key information on each topic, *The No-nonsense Guide to Research Support and Scholarly Communication* provides an ideal primer for those who seek to work in this area or those who have acquired these responsibilities as part of a wider role. The practical nature of the book means readers can dip into it or read it from cover to cover as needed. It includes practical checklists of knowledge and skills, international case studies by practitioners from around the globe, end of chapter references, how-to sections, activities and links to freely available online training materials. The book covers: - scholarly communication, open research and the research lifecycle - research data management - open access - disseminating research - metrics and measuring impact including the Journal Impact Factor, H-Index and Altmetrics - career paths in research support - why and how library staff at all levels can get

involved in the process of doing research and sharing their outputs. The book will be essential reading for academic librarians who have had research support duties added to their role with little or no formal training or those who have taken on a newly created role and are unsure of how best to use their existing skills or develop new ones suitable for a role in research support. The book will also be of interest to public librarians who may be dealing with supporting their own research communities and those who are considering taking on a career in this growing area but are unsure where to turn for guidance including students studying for postgraduate library qualifications and those who have undertaken qualifications in publishing. *Qualitative Research in Nursing and Healthcare* Immy Holloway 2023-11-09 Discover how to conduct qualitative nursing research with confidence Co-authored by experienced researchers *Qualitative Research in Nursing and Healthcare* offers practical and applied examples for those who carry out qualitative research in the healthcare arena. With clear explanations of abstract ideas and practical procedures, this updated edition incorporates recent examples in nursing research and developments in the qualitative field, providing readers with the latest approaches and techniques for gaining insight into people's attitudes, behaviours, value systems, concerns, motivations, aspirations, culture and lifestyles. From ethnographies to action research, readers will find explorations of data collection, sampling and analysis, including discussions of: Interviewing and participant observation, strategies, and procedures Trustworthiness and validity, and ensuring the credibility of qualitative research A variety of approaches in qualitative research, such as grounded theory, phenomenology and narrative inquiry Whether you're a postgraduate nursing student, a third-year nursing student on a pre-registration nursing programme, or a qualified nursing and healthcare staff member, *Qualitative Research in Nursing and Healthcare* is the perfect resource to help you conduct meaningful research with confidence. **Study Skills for Social Workers** Christine Stogdon 2010-05-05 *Study Skills for Social*

Workers offers an accessible insight into the practical use of skills for study in a professional social work context. Engaging with students on their journey through the undergraduate or postgraduate qualifying course, it uses relevant case material from academic and social work perspectives to demonstrate the connection between study and practice.

How to Write a Master's Thesis Yvonne N. Bui 2019-07-31 "This is the best textbook about writing an M.A. thesis available in the market." -Hsin-I Liu, University of the Incarnate Word The Third Edition of *How to Write a Master's Thesis* is a comprehensive manual on how to plan and write a five-chapter master's thesis, and a great resource for graduate students looking for concrete, applied guidance on how to successfully complete their master's degrees. While research methods and statistics courses may teach students the basic information on how to conduct research, putting it all together into a single project and document can be a challenge. Author Yvonne Bui demystifies this process by integrating the language learned in prerequisite methods and statistics courses into a step-by-step guide for developing a student's own thesis or project.

The Literature Review Diana Ridley 2012-07-31 This Second Edition of Diana Ridley's bestselling guide to the literature review outlines practical strategies for reading and note taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a

systematic review, increased coverage of issues of evaluating quality and conducting reviews using online sources and online literature and enhanced guidance in dealing with copyright and permissions issues.

Writing and Presenting Research Angela Thody 2006-06-15 This accessible and wide-ranging book is an invaluable introductory guide through the choices to be made when deciding how to report research. *Writing and Presenting Research* covers research written as theses and dissertations; chapters, books, reports and articles in academic, professional or general media such as newspapers; and also reviews the options for presenting research orally as lectures, keynotes, conference papers and even TV game shows. These forms of reporting research have well-established conventions for their formats, but they also have growing numbers of alternative possibilities. This has generated debate about what is, or is not, acceptable, and the aim of this book is to make this debate more manageable for those wanting to assess which of the conventional or alternative possibilities on offer is most appropriate for reporting their current research. Arranged in easily followed sections enlivened with checklists, style variations, examples and reflection points, *Writing and Presenting Research* has relevance to the social sciences, arts, humanities, natural and applied sciences and law and is an invaluable reference tool for new and experienced researchers alike. Research Methods for Business and Social Science Students John Adams 2014-03-04 Research Methods for Business and Social Science Students aims to present a clear discussion of the research methods employed in various disciplines related to our daily life problems. The theoretical basis of research methods is explained clearly and succinctly. Collecting data is a key part of the book and this includes both qualitative and quantitative methods of data collection, along with the advantages and disadvantages of each method. The book also describes in clear terms how students can analyse data, interpret results and link these to the literature review and hence their own contribution. It sets out a range of fundamental ideas in research methods, such as deductivism and inductivism, and explains why methodology is not the same as method. In this second edition every chapter has been re-written to be more readable and also to include more examples. The authors have also added a real

student research proposal and a multiple-choice test with answers for the readers to test their own understanding of the ideas in the book. The book has been designed to illustrate research tools in a clear and accessible manner through chapters on such topics as formulating research, research design, data analysis and writing up the research results.

[How to Critique Journal Articles in the Social Sciences](#) Scott R. Harris 2022-01-03 Journal articles form the bedrock of social science, but they can be unfamiliar and intimidating to students. This brief, introductory guide helps readers appreciate the rigor and pitfalls of research by comparing it to more ordinary ways of knowing. Each chapter focuses on a key aspect of articles, demystifying step-by-step the complexities of social research. Harris encourages readers to avoid naivete (accepting research findings as simple Truth) and cynicism (dismissing research as hopelessly flawed), and instead adopt a critical perspective that appreciates the strengths and weaknesses of any piece of

scholarship. A new chapter on research design explores how scientists choose a broad approach to study a topic, which impacts subsequent research decisions. Exercises throughout allow readers to practice the highlighted techniques in class discussion, short assignments, or a major writing project. Comprehensive yet succinct and accessible, the second edition of How to Critique Journal Articles in the Social Sciences equips students with the confidence to read and understand social research for use in their education, careers, and personal lives.

Achieving Impact in Research Pam Denicolo 2013-10-22 This unique addition to the Success in Research series addresses the importance of understanding and achieving impact for the purposes of gaining research funding and reporting achieved impact for the Research Excellence Framework (REF). The book includes contributions from researchers and researcher developers who feel that impact is ill-defined and poorly understood despite its prevalence in policy documents, websites and institutional activities. This succinct and cohesive text draws on the expert contributors' collective research practice, knowledge and experience. Using a variety of examples, boxed activities and highlighted reflection points, this practical guide covers the following key areas: The meaning of impact in relation to research How the Impact Agenda fits with attitudes and ethics that motivate research The different characterisations of research impact and when impact is apparent How impact can be planned into proposals, evaluated and evidenced The skills needed to be an impactful researcher How impact can be supported through Knowledge Exchange and effective partnerships This is a must-have guide for anyone seeking to understand and achieve impact in their own research. The Success in Research series, from Cindy Becker and Pam Denicolo, provides short, authoritative and accessible guides on key areas of professional and research development. Avoiding jargon and cutting to the chase of what you really need to know, these practical and supportive books cover a range of areas from presenting research to achieving impact, and from publishing journal articles to developing proposals. They are

essential reading for any student or researcher interested in developing their skills and broadening their professional and methodological knowledge in an academic context.

The SAGE Handbook of Social Research Methods Pertti Alasuutari 2008-02-25 The SAGE Handbook of Social Research Methods is a must for every social-science researcher. It charts the new and evolving terrain of social research methodology, covering qualitative, quantitative and mixed methods in one volume. The Handbook includes chapters on each phase of the research process: research design, methods of data collection, and the processes of analyzing and interpreting data. The volume maintains that there is much more to research than learning skills and techniques; methodology involves the fit between theory, research questions research design and analysis. The book also includes several chapters that describe historical and current directions in social research, debating crucial subjects such as qualitative versus quantitative paradigms, how to judge the credibility of types of research, and the increasingly topical issue of research ethics. The

Handbook serves as an invaluable resource for approaching research with an open mind. This volume maps the field of social research methods using an approach that will prove valuable for both students and researchers.

Doing a Literature Review Chris Hart 1998-11-06

'This book can provide an excellent framework for bolstering what is often an experiential process - doing a literature review. It is best seen alongside the supervisor, as a guide, through the multidimensional sea of academic literature' - British Educational Research Journal Reviewing the literature for a research project can seem a

daunting, even overwhelming task. New researchers, in particular, wonder: Where do I start? What do I do? How do I do it? This text offers students across the social sciences and humanities a practical and comprehensive guide to writing a literature review. Chris Hart offers invaluable advice on how to: search out existing knowledge on a topic; analyse arguments and ideas; map ideas, arguments and perspectives; produce a literature review; and construct a case for investigating a topic. *Doing a Literature Review* contains examples of how to cite references, structure a research proposal and present a Master's thesis. It is published as a Set Book for The Open University Postgraduate Foundation Module (D820) *The Challenge of the Social Sciences*. 'I have been waiting for this book for five years. It sets out a number of important dimensions involved in the process of literature review and by clear signposting, diagrams, and examples will help the student to carry out her or his review more systematically. Learning how to carry out a literature review has always entailed the experiential. While this is the best way of learning, it is only so providing that learning actually takes place during the experience (or by reflection afterwards). This book makes explicit those dimensions which could remain implicit or even missed by the student as they wade through all those books, papers, articles, and print-outs' - Kevin Maguire, Nottingham Trent University

Researching Real-World Problems

Zina O'Leary 2005-11-04 This is the perfect book for any student new to Research Methods. It is brilliantly written, witty, and always easy to understand. Taking as her starting point the need for students to conduct research for themselves in the 'real world', Zina O'Leary guides those new to research through the whys and how-tos of the entire research process. Always student-focused, this book offers a hands on and practical guide to the research process from the initial process of coming up with a good question, via methods of gathering information, through to the writing process itself. Researching Real-World Problems: - Makes the entire research process a meaningful experience - Provides a jargon-busting hands-on guide to the entire research process - Is illustrated throughout with real-life examples - Speaks directly to the needs of the new researcher - Locates the researcher and research process at heart of a complex web of social structures - Provides via the Companion Website link above, PowerPoint slides that cover all 12 chapters of the book. They can be printed out as separate transparencies or used in PowerPoint based lectures. They would also be suitable for applications in e-learning/ web-based teaching. O'Leary draws her examples from the full range of the Social Sciences, and this is the perfect text for any student in Health, Education or Applied Social Science.

Empowering the Children's and Young People's Workforce

Simon Brownhill 2014-02-03 While the provision in Children's and Young People's Services endures much change and turbulence,

the calling for well qualified and critically reflective practitioners remains ever present. This innovative and accessible core textbook explores the key themes, ideas, concepts and topics that are central to practitioners working across the 0-19 sector. It aims to help students develop the professional knowledge, practical skills and core values they need to work effectively with children and young people. Clearly divided into four sections; the practitioner, the learner, the workplace and the community, the book covers a broad range of issues including: The different roles and responsibilities of the workforce Multi-agency working and its challenges Working with parents, carers and the community Supporting children with additional needs and meeting the needs of gifted learners Work-based reflective practice Language learning and communication At each stage the book facilitates opportunities for personal and professional reflection, discussion, debate and action through case studies, activities, reflective tasks, areas for further consideration, and annotated further readings. The text also features a glossary of terms and links to practice standards. The book is supported by a free companion website featuring instructor resources such as assignable case studies, reflective tasks and activities, tables and figures from the book available to download, and sample chapters from the book; and student resources including helpful links to further information, links to relevant video material, and an interactive flashcard glossary. Empowering the Children's and Young People's Workforce seeks to empower the reader by supporting their initial and continuing professional development, enabling them to positively influence provision for children and young people. It is essential reading for anyone studying or working in this sector.

Reading and Understanding Research

Lawrence F. Locke 2004-03-03 Reading and Understanding Research, Second Edition is based on the notion that helping to demystify the process of consuming research will not only make for better students, but will help make for better research. The authors presume no special background in research, and begin by introducing and framing the notion of reading research within a wider social context. Next they offer insight on when to seek out research, locating and selecting the right reports, and how to help evaluate research for trustworthiness. A step-by-step reading of reports from qualitative and quantitative studies follows, and the final chapters examine in greater detail the different types of research to be encountered and how to examine the research more critically. This book is ideal for a novice researcher (and those that teach them!). *How to Read Journal Articles in the Social Sciences* Phillip Chong Ho Shon 2012-03-19 'Shon's writing is engaging and entertaining; he opens up the "black box" of academic reading and writing, explaining how to decode and critique formal scientific writing and systematically organize information gained from reading journal articles' - Dr Lorraine Whitmarsh, School of Psychology, University of Cardiff, UK 'Once the reader has mastered Philip Shon's codes and applied them to texts, it will become increasingly impossible not to write and critique with integrity. I thoroughly recommend this book' - Professor Helen Cowie, Faculty of Health and Medical Sciences, University of Surrey, UK Many texts provide tips for successfully writing theses,

dissertations, and journal articles. All argue that writing is like any other skill - it has to be developed, taught, and practiced daily. The same is certainly true of academic reading, yet many advanced students have trouble with the essential skill of 'reading critically'. This handy guide teaches you how to read so you're able to maximize your output in the writing process, whether you're a student or early career researcher. The author's unique reading code teaches you how to approach social and behavioural science journal articles as texts that can be deciphered structurally, mechanically and grammatically. The strategies included allow you to systematize the reading, note-taking and organizing of voluminous amounts of information in an easily identifiable and retrievable format, which will be a huge confidence boost to anyone who struggles with this first phase in the writing process. This book is indispensable for social and behavioural science students and researchers worldwide wanting to sharpen their critical evaluative skills for better academic writing. ?
